Annual report of Sovcomflot (PAO Sovcomflot, the Company) for 2018 includes the operating results of PAO Sovcomflot and its subsidiary companies, referred to as Sovcomflot Group (SCF Group). It discloses the operational and financial results, and certain aspects of the activity and figures in the area of sustainable development.

The report is prepared in accordance with the requirements of the Regulation on Information Disclosure by Issuers of Issue-Grade Securities approved by order of the Central Bank of the Russian Federation dated 30 December 2014 No. 454-P; by taking into account a model structure of the joint-stock company’s annual report, shares of which are in federal ownership, approved by Resolution No. 1214 of the Russian Government dated 31 December 2010; and by taking into account the recommendations of the Corporate Governance Code of the Bank of Russia.

The report is drawn up based on an analysis of the operational data and figures of the financial statements of PAO Sovcomflot for 2018 prepared in accordance with International Financial Reporting Standards. Perimeter of the information disclosed in the report coincides with the consolidation perimeter for purposes of the statements preparation under IFRS. The report may contain discrepancies in calculation of shares, percents, amounts made in rounding of the estimate indicators.

The accuracy of information contained in this report is certified by the Auditing Commission of the Company.

The 2018 annual report of PAO Sovcomflot was preliminarily approved by the Company’s Board of Directors (Minutes No. 180 of 15 April 2019) and approved by the Annual General Meeting of Shareholders.

Annual reports of PAO Sovcomflot for the previous years are available on the Company’s website in the Investors section.

Sovcomflot Group: Key Facts

Russia’s largest shipping company and one of the global leaders in marine transportation of hydrocarbons (crude oil and petroleum products, liquefied gas) and in transport servicing of oil and gas projects on the continental shelf, including offshore seismic exploration.

As of 31 December 2018 the Group’s fleet included 144 vessels with a total deadweight of 12.44 million tonnes. The world’s leading operator and the largest owner of ice-class vessels designed to operate in difficult navigational conditions: 80 ice-class vessels rated from ICE 1C to Arc7 and Icebreaker ICE-15. The Group’s staff totals over 7,800 people offshore and onshore. The Company is one of the largest employers in the cities located at the seaside in North-West, South and Far East of Russia.

The average age of the fleet is 10.2 years. 4 new vessels were added to the fleet in 2018.

SCF Group’s fleet includes the world’s first Aframax tankers specially designed to run on LNG. Main charterers include major international and Russian oil&gas companies and traders, such as Gazprom, Sakhalin Energy, Royal Dutch Shell, Lukoil, Vitol, Exxon Neftegas, Novatek, Yamal Trade, Glencore, PetroChina, Trafigura, Total, BP, Chevron, Sibur, Phillips 66, Repsol, Eni, Rosneft.

The Group has offices in Moscow, St. Petersburg, Novorossiysk, Murmansk, Vladivostok, Yuzhno-Sakhalinsk, Limassol, and Dubai.

SCF Group is involved in servicing large oil and gas projects in Russia and abroad: Yamal LNG, Sakhalin-1, Sakhalin-2, Prirazlomnoye, Novy Port, Varandey, Tangguh (Indonesia), Peru LNG.
February

- Sovcomflot Group and Shell entered into long-term charter contracts for two new-generation Aframax tankers using LNG as the primary fuel.
- A ceremony of raising the flag of the Russian Federation and naming of a new multifunctional icebreaking platform supply vessel, Yevgeny Primakov, took place in Saint Petersburg.
- Sovcomflot and Sberbank signed a project financing agreement for a total amount of US$106 million and a term of up to 14 years. The funds were used to build an Arctic shuttle tanker for servicing Gazprom Neft's Novy Port project.

April

- Sovcomflot Group entered into a credit facility agreement for a total amount of US$252 million and a term of up to 7 years with a consortium of six international banks (ABN AMRO Bank, BNP Paribas, Citibank, ING Bank, KfW IPEX-Bank and Societe Generale). The raised funds were used to finance the construction of a series of six LNG-fuelled Aframax crude oil tankers.
- Marine Money named the credit facility agreement between Sovcomflot and VTB as the Deal of the Year in Project Financing – West category. The borrowed capital was used to finance the construction of the Arctic LNG carrier Christophe de Margerie.

March

- Russian President Vladimir Putin signed a decree to confer state awards on a group of Sovcomflot employees for major contribution to the implementation of the project for creating the world’s first icebreaking LNG carrier, Christophe de Margerie.
- Sovcomflot won the annual contest «Industry Leader», organized by the Federal Marine and River Transport Agency, in category «Shipping company engaged in maritime liquid bulk cargo transportation».

May

- The 17th annual conference of business partners of PAO Sovcomflot, timed to coincide with the 30th anniversary of the establishment of Sovcomflot as a joint-stock company, was held in Saint Petersburg.
- The Russian round of the Fort Ross Dialogue, an annual Russo-American conference, took place in Veliky Novgorod with the support of Sovcomflot and its partners, Transneft and Chevron.
June
• Sovcomflot Group and NOVATEK signed a strategic partnership agreement to provide transport support for Yamal LNG, Arctic LNG 2 and other Arctic projects developed by NOVATEK.

July
• Gagarin Prospect, the first vessel in a series of six Aframax oil tankers of a new generation specially designed to run on LNG was delivered to SCF Group.

August
• The LNG carrier Pskov delivered to consumers the first batch of liquefied gas produced by the second production line of the Yamal LNG plant.
• Sovcomflot’s shuttle tanker Governor Farkhutdinov delivered the milestone 600th cargo of crude oil from Sakhalin-2 to the port of Quanzhou, China.

September
• An order for the construction of a series of two LNG-fuelled Aframax crude oil tankers was placed at the Zvezda Shipbuilding Complex. The ships will be subsequently chartered to Rosneft under 20-year time charter contracts.
• SCF Far East Tall Ships Regatta 2018 was successfully completed. Vladimir Putin presented Sergey Vorobiev, captain of the sailing ship Nadezhda, with the prize for the first place won by the ship in the race of Class A tall ships from Yeosu (South Korea) to Vladivostok.
• The Arctic LNG carrier Christophe de Margerie delivered to consumers the milestone 5-millionth tonne of liquefied natural gas from the Yamal LNG plant.
• The Vessel Electric Propulsion Training Centre was opened at the Admiral Nevelskoy Maritime State University with the support of Sovcomflot and ABB to prepare seafarers for work on vessels equipped with Azipod propulsion units. The opening ceremony was attended by Russian Minister of Transport Yevgeny Dietrich.

October
Sovcomflot became the winner of the 2018 International Competition for Scientific, Technical and Innovative Projects aimed at the development and exploration of the Arctic and the continental shelf, held with the support of the Russian Government and the Russian Ministry of Energy. A team of company specialists was honoured with the first prize for the development of technological solutions enabling the creation of an autonomous system for reliable and safe navigation in the most challenging zones of the Gulf of Od.

November
• Sovcomflot entered into a US$149 million credit facility agreement for a term of up to 10 years with a consortium of three European banks (ING Bank, KfW IPEX-Bank and Credit Agricole CIB).
• The LNG carrier Pskov completed the first LNG ship-to-ship transfer operation for the Yamal LNG project. This operation marked the start of a new stage in the development of the transport logistics system for delivery of Yamal gas to consumers.

December
• The Arctic LNG carrier Christophe de Margerie loaded the first cargo of LNG produced on the third production line of the Yamal LNG project. The cargo operations at the port of Sabetta were inaugurated by Prime Minister Dmitry Medvedev.
• Sovcomflot won the Environment Award – Individual Company at the 2018 Lloyd’s List Global Awards.
• Sovcomflot entered into a US$264 million revolving credit facility agreement for a term of up to six years with a consortium of five international banks (Citibank, DVB Bank, ING Bank, Societe Generale and UniCredit).
• An order for the construction of three LNG-fuelled MR product tankers was placed at the Zvezda Shipbuilding Complex.
SCF’s global environmental initiative

In 2018 Sovcomflot put into operation large-capacity LNG-fuelled tankers. The Company, in partnership with Shell, set a new standard for environmental sustainability in maritime shipping.

Advantages of operating on LNG
The reduction of sulphur oxides and soot emissions reaches 100%, nitrogen oxides emissions decrease by 76% and carbon dioxide emissions by 15% as compared with power plants running on conventional heavy fuel.

Distance: 2,194 nautical miles
Voyage time: 7.8 days

The use of LNG as the primary fuel for large capacity tankers is vital for the fragile ecosystem of the Arctic region.

Development of LNG bunkering infrastructure
The first ship-to-ship LNG bunkering took place at the Port of Rotterdam in early October 2018 when Shell’s bunker vessel Cardissa re-fuelled SCF’s large-capacity tanker Gagarin Prospect.

This set an important precedent for the global shipping industry to use LNG as a fuel for large-capacity vessels.
The Sovcomflot Board of Directors notes that the stable operating and financial performance of the Company was achieved amidst the continuing unfavourable conditions in the global market for maritime transportation of crude oil and petroleum products. The global conventional tanker market has experienced a protracted downturn over the last few years. In 2017-2018, freight rates for conventional vessels were steadily falling and by mid-2018 reached the lowest values since 1992.

Despite the objective difficulties, Sovcomflot fully accomplished the tasks set by the shareholder, having once again confirmed the effectiveness of the current business model, which contemplates the expansion of participation of the Company’s fleet in industrial projects with high value added, primarily those associated with the servicing of offshore oil and gas production and transportation of liquefied natural gas.

The consistent implementation of the Strategy enabled the Company to achieve better financial results for the year than most competitors and record an operating profit of USD 187.3 million. The RAS net profit of PAO Sovcomflot amounted to RUB 2,870 million. The Company’s stable financial position enables it to allocate RUB 1,434.8 million for dividend payments.

In 2018 the Company strengthened its position as the industry’s technological leader by having successfully implemented the project for creating a Green Aframax tanker series. These vessels that use LNG as the primary fuel meet the highest global standards for environmental sustainability and energy efficiency. The Company’s work in this area is in full accordance with the state programme of the Russian Federation that provides for the expansion of the use of gas engine fuel in the transport sector. Being one of the largest customers in the Russian civil shipbuilding industry, Sovcomflot contributes to localising the construction of these vessels in Russia at the Zvezda Shipbuilding Complex in Primorsky Krai.

Human capital is the most valuable asset of Sovcomflot. The Company is one of the most stable and attractive employers in the Russian shipping industry. The Company views support for the young generation and fostering future talents for the transport industry as an important element of social responsibility. As part of cooperation with the country’s leading maritime universities and occupational guidance organisations, Sovcomflot is consistently implementing educational programmes in accordance with the priorities of the domestic maritime industry.

The Board of Directors expresses its deep gratitude to all partners and customers of Sovcomflot Group for mutually beneficial and fruitful cooperation. Thanks to your trust and support, the Company managed to achieve all the set goals and can look into the future with confidence.

IAS Kliebanov
Chairman of the Board of Directors
PAO Sovcomflot
In 2018, the work of shipping companies engaged in the transportation of hydrocarbons was undertaken in extremely challenging conditions. Due to a significant surplus of tonnage supply over demand, freight rates for crude oil tankers were much lower than the levels seen in the previous twelve months, which was previously considered one of the most difficult periods for crude oil and petroleum product shipping in recent history. The negative impact of non-market factors on global trade and finance increased which, in combination with soft market conditions, contributed to a deterioration in the financial performance of tanker owners operating vessels primarily in the conventional market segment.

Against this background, the Group’s consistent implementation of its current business strategy, which prioritises its development in premium market segments, such as the servicing of offshore oil and gas production and the transportation of liquefied natural gas for long-term energy projects, enabled Sovcomflot to deliver steady operational and financial results for the reporting period.

The Group’s revenues from the servicing of offshore oil and gas production and gas transportation saw steady growth, accounting for 57% of TCE revenue at the year-end, compared with 51% at the end of the prior year. As a result, the Group’s gross revenue reached USD 1,519.9 million, having increased by 5.9% year-on-year. EBITDA rose by 6.5% to USD 580.7 million, and operating profit stood at USD 187.3 million.

The results in 2018 enabled the Group to implement its investment programme in full, and Sovcomflot was also able to confirm its global leadership in the development and mastering of the most effective and safe technical solutions deployed within the tanker industry. Three vessels from a series of six new-generation Aframax tankers, using the more environmentally friendly LNG as their primary fuel, were added to SCF’s fleet. In the second half of 2018, orders for another five LNG-fuelled tankers - two crude oil Aframax tankers and three MR product tankers - were placed at the Zvezda Shipbuilding Complex in Primorsky Krai, Russia. Meanwhile, a new operations centre serving SCF’s fleet activities in the Arctic was commissioned. This centre has a wide range of functional capabilities for handling complex navigational tasks, using the latest digital technologies, and has virtually no analogues in the industry.

Over the past year, SCF strengthened its leadership in the servicing of hydrocarbon fields on the continental shelf, as well as oil & gas projects in the Arctic and sub-Arctic regions. With the commissioning and long-term charter of Yevgeny Primakov to Sakhalin Energy, the Sakhalin-2 project operator, the Group’s fleet of multifunctional icebreaking platform supply vessels servicing the Sakhalin projects reached 10 units.

As part of a further development in the Group’s interaction with NOVATEK, SCF’s LNG carriers Pskov and Christophe the Margerie delivered the first cargoes of liquefied natural gas to consumers produced in the first and third phases of the Yamal LNG project respectively. In June, SCF Group and NOVATEK entered into a strategic cooperation agreement regarding logistics support for the Yamal LNG, Arctic LNG-2 and other projects.

Work is currently being completed on the Sovcomflot Strategy for the period up to 2025, under which the Group is to maintain its development focus that guarantees further business stability and steady results.

The fourth quarter of 2018 saw some signs of recovery in market conditions. The positive dynamics of spot freight rates, which generally continued in the first quarter of 2019, together with a forecasted balance in tanker tonnage supply and demand, which favours shippers, give us grounds to view the current year and 2020 with cautious optimism.

As at 31 December 2018, the Group’s total contracted future revenue stood at USD 8.4 billion.

Human capital has been and remains key to the Group’s success. In 2018 a long-term employee motivation programme, approved by Sovcomflot’s Board of Directors, was implemented. The programme participants include distinguished masters and chief engineers across SCF’s fleet who perform their voyage responsibilities in a quality and accident-free manner, and pay special attention to fostering the development of SCF’s younger officers.

The Executive Board of PAO Sovcomflot expresses its special gratitude to all of the Group’s employees - fleet masters, crews and onshore personnel - for their high professionalism and great contribution to strengthening the Group’s economic prospects. I thank the shareholder, customers and our partners for their effective support and participation in the implementation of the Group’s plans.

Sergey Frank
President and Chief Executive Officer,
Chairman of the Executive Board
PAO Sovcomflot

The results in 2018 enabled the Group to implement its investment programme in full, and Sovcomflot was also able to confirm its global leadership in the development and mastering of the most effective and safe technical solutions deployed within the tanker industry.

USD 1,519.9 million gross revenue
USD 187.3 million operating profit
USD 8.4 billion total contracted future revenue
1.1. COMPANY PROFILE

Public Joint-Stock Company Sovcomflot is Russia’s largest shipping company, as well as a global leader in the maritime transportation of hydrocarbons and the servicing of offshore oil and gas exploration and production.

The company’s own and chartered fleet, specialising in oil and gas shipping in difficult ice conditions, includes 144 vessels with a total deadweight of 12,443 thousand tonnes and an average age of 10 years. 80 vessels have an ice class.

The SCF fleet is organised into four divisions:

- Conventional tanker fleet management and development division;
- Gas fleet management and development division;
- Offshore fleet management and development division;
- Seismic exploration division.

Fleet structure by division as of 31 December 2018

More detailed information can be found in section 3.1.1. of this Report, Fleet composition, and on the SCF website in the List of vessels section.

Sovcomflot Group operates vessels in segments which attract the most demand from leading Russian and international oil and gas companies. SCF Group is involved in servicing large oil and gas projects in Russia and beyond: Yamal LNG, Sakhalin-1, Sakhalin-2, Prirazlomnoye, Novy Port, Varandey, Tangguh (Indonesia).

1. The fleet structure by division differs from the operating segments structure reported under IFRS (for more details see the financial statements).
2. The fleet of joint ventures.
3. Including the fleet of joint ventures: 4 LNG carriers.
Our in-house engineering and a set of advanced technologies, especially those related to shipments in extreme weather conditions, are unique for a shipping company, and enable the Group to satisfy the various requirements of our customers and to provide them with a safe, reliable and efficient transport service.

Commercial units of Sovcomflot Group focus on work with major oil & gas and trading companies. Tonnage is chartered out on a competitive basis under the principles of equal conditions and opportunities for all customers.

1.2. INDUSTRY OVERVIEW

1.2.1. Global market trends

Historically, the international tanker market has been characterised by marked cyclicity and a large amplitude of fluctuations in freight rates due to changes in tonnage supply and demand.

Demand for tanker transportation is affected by a number of factors, including supply and demand for crude oil and oil products, the availability of refining capacity, the economic situation in global and regional markets, the distances over which oil and petroleum products are transported, and competition from other modes of transport.

Supply in the tanker market is also affected by a number of factors, including the pace and quantities of new ship deliveries, old tonnage disposal rate, conversion of existing fleet, and changes in industry regulation.

Oil market

Since the beginning of 2018 the price structure in the oil markets has remained in backwardation, which negatively affected the demand for oil tankers for both floating storage and arbitrage shipments over long distances. The policy pursued by OPEC and the largest producers in an attempt to reduce crude oil inventory levels was effective. In February 2018, inventories almost reached the average level for the last five years. Nevertheless, the rate of inventory reduction was, apparently, lower than previously expected, which led to the oil production cap deal being extended until the end of 2018. The output reduction reached 140% in the first quarter, which meant an actual cut in OPEC production by 2.4 million barrels per day against the 1.8 million envisaged by the agreement.

On the back of positive macroeconomic indicators in the USA, China and other largest economies, which prompted an upward revision in global economic growth forecasts, and a tangible result in maintaining oil supply discipline since the early 2018, oil prices have been increasing steadily, with Brent crude reaching US$75-80 per barrel in 2Q and 3Q 2018. In June 2018, OPEC countries reached an agreement to gradually increase oil production by 1 million barrels a day. As soon as in June, there emerged trends towards an increase in the number of oil cargoes in the market and cautious optimism regarding improvement of the situation in the freight market by the end of the year.

Oil prices were rising during the third quarter and at the beginning of the fourth quarter. As a result, the average monthly Brent crude price in October amounted to US$81.03 a barrel. Concerns about potential disruptions in oil deliveries due to the renewal of U.S. sanctions against Iran from the beginning of October were one of the major price growth factors. However, due to the entry of additional oil into the market, the lack of a significant reduction in Iranian exports and an increase in the risk of deceleration in the Chinese economy in 2019, oil prices fell in November and remained at US$55-65 per barrel during 4Q 2018. The futures price structure shifted to contango from time to time.

Tanker market

2018 proved to be a second consecutive challenging year for the tanker industry, with trading conditions remaining extremely difficult and the spot rates well below their historical averages. Tanker markets hit the lowest level on average since 1992.

---

Dynamics of the value of the ClarkSea Index

1. See the Glossary.
2. See the Glossary.
3. See the Glossary.
Despite the positive trends of 4Q, in 2018 the value of the ClarkSea Index amounted to USD 11,216 per day (the lowest value of the index was recorded in 1992 at USD 8,983 per day).

No improvements were seen in the tanker markets during the period from December to September 2018. In addition to a decrease in demand for oil transportation due to OPEC countries exceeding their production cut targets (the actual cut in production in 1H 2018 was about 2.4 million barrels per day), the rates of new ship deliveries from shipbuilding yards were high in 1H 2018, including due to ship delivery deadlines previously agreed between shipbuilder and shipowners who suffered losses having been brought forward from 2017. The rates for VLCC, Suezmax and Aframax crude oil vessels during the period from December to September 2018 were on average 5-65% lower than average rates in 2017, and 50-60% lower than in 9M 2017. For LR2, LR1 and MR product vessels, the rates were at the 2017 level.

There was, however, a visible rebound in freight rates in the Q4 2018. Largely thanks to an increase in oil production by OPEC countries and Russia following the decision to revise the oil production cap deal and amid the seasonal increase in demand for transportation of oil and petroleum products, tanker markets grew significantly, and in December the rates reached the level seen at the end of 2015.

A positive factor that contributed to achieving a balance between the supply and demand for tankers by the end of 2018 was an increase in activity in the scrap market in the first quarter. Due to low freight rates and high metal prices, 25 VLCC vessels and 21 Aframax vessels were sold for scrapping during 2018. The pace of new ship deliveries has decreased since the beginning of 3Q 2018, which is one of the factors necessary to achieve a balance in tanker markets.

On average, only Suezmax and Aframax tankers showed a slight improvement in 2018 compared to 2017, while average rates for other tanker categories declined.

### Dynamics of tanker time charter rates (USD per day)

![Dynamics of tanker time charter rates (USD per day)](image)

Source: Clarksons

### New build and S&P market

Activity in the second-hand tanker market was declining at the beginning of the year, but the demand for vessels recovered beginning from the second quarter and for the full year increased by 19.55% compared to 2017, with 333 deals (total deadweight: 25,960 thousand tonnes, total value: USD 4,956 million) against 279 deals in 2017 (total deadweight: 27,838 thousand tonnes, total value: USD 5,586 million). A significant factor in the initial decline in buyers’ interest in tonnage, apart from low freight rates, was the uncertainty regarding the impact of the approaching entry into force of the 0.5% cap on sulphur content in bunker fuel from 2020 and the need to factor in investments in ballast water treatment systems that must necessarily be installed on vessels during dock repairs after September 2019. Meanwhile, due to the same factors, prices for second-hand tonnage decreased significantly in 2018, which in turn attracted buyers to the market after the first quarter.

Prices in the tanker sale and purchase market dropped by 20-25%. Prices for bulk carriers stagnated following growth in 2017.

1. Clarksons Research Services data for 2017 as of 31 December 2018 were updated in comparison with similar data as of 31 December 2017.

At the end of 2017 and during 2018, the demand and orders for new vessels increased multiply compared to stagnation in the shipbuilding market in 2016 and 1H 2017. The segments of container ships and LNG carriers accounted for the major part of orders in 2018. The number of orders for both tanker and dry cargo fleet also increased significantly due to the reasonable expectation that the bottom in prices for new ships had been passed. The value of orders for new ships has increased by about 15% since the beginning of 2018 due to the stabilisation of demand for contracts and an increase in metal prices and exchange rates of currencies used by Far East shipbuilders.

1. Clarksons Research Services data for 2017 as of 31 December 2018 were updated in comparison with similar data as of 31 December 2017.

1.2.2. Competitive position

Main competitors of Sovcomflot Group in core business areas are:
- Fredriksen Group, Cyprus;
- Teekay Corporation, Canada;
- Euronav NV, Belgium;
- Knutsen OAS Shipping, Norway;
- China COSCO Shipping, China;
- Mitsui O.S.K. Lines, Japan;
- Dynacom Tankers, Greece;
- Scorpio Group, Monaco;
- Torm A/S, Denmark;
- Minerva Marine, Greece;
- BW Group, Bermuda;
- Tsakos Group, Greece;
- MISC, Malaysia.

The Group’s share of the freight market does not exceed 1%. Any change in this indicator over the past three years is considered immaterial (less than 0.01%) due to the high degree of fragmentation on the tanker transportation market and the continued presence of a significant number of operators, estimated in total at about 3,200 (including approximately 200 companies with a fleet of 10 or more tankers).

According to Clarksons, at the end of the reporting period Sovcomflot Group held the following positions in global shipowner rankings:

**No. 1 IN THE WORLD**

Arctic shuttle tanker fleet
Ice-class tanker fleet
Aframax tanker fleet
Fleet of multifunctional icebreaking vessels

Parameter | Global ranking
--- | ---
Arctic shuttle tanker fleet | 1
Ice-class tanker fleet | 1
Aframax tanker fleet | 1
Fleet of multifunctional icebreaking vessels | 1
Size of tanker fleet | 3
Shuttle tanker fleet | 3
Ice-class LNG tanker fleet | 3
Product tanker fleet | 6

1. Clarksons Research Services data for 2017 as of 31 December 2018 were updated in comparison with similar data as of 31 December 2017.

2. Clarksons Research Services data for 2017 as of 31 December 2018 were updated in comparison with similar data as of 31 December 2017.

The Sovcomflot Development Strategy is to expand the highly profitable industrial business portfolio (long-term contracts with a fixed return) while retaining a leading position in the conventional tanker segment, based on implementation of advanced environmental protection technologies and strengthening of cooperation with key charterers.
2.1. STRATEGY OF SOVCOMFLOT GROUP

The Group Strategy up to 2017 was approved by the Board of Directors in September 2011. The strategy parameters were updated in 2013 with the planning horizon extended to 2018.

According to the Strategy, Sovcomflot Group’s mission is to manage the portfolio of assets in the segments of maritime transportation of hydrocarbons (crude oil, liquefied gas) and servicing of offshore oil and gas production. The goal of the Company’s strategy is to ensure a continuous increase in shareholder value by maximising returns from ownership of assets and fleet operation while maintaining national interests and high quality and operational safety standards.

The main strategic development areas of SCF Group are:
- Services for offshore hydrocarbon exploration and production in harsh climatic and ice conditions;
- Liquefied gas transportation;
- Conventional energy shipping.

The Strategy sets forth the Sovcomflot Group’s priorities in sustainable development: ensuring navigation safety; reducing adverse environmental impacts; improving the professionalism of personnel; and placing a focus on technical and innovative development.

2.2. LONG-TERM DEVELOPMENT PROGRAMME OF SOVCOMFLOT GROUP

The Long-Term Development Programme (LDP) of PAO Sovcomflot intended for the period 2014 – 2020 provides an update on the Company’s development strategy. The LDP was approved by the Company’s Board of Directors in November 2014 after coordination with relevant agencies and review at a meeting held with the participation of representatives of the Government of the Russian Federation.

The main goal of the LDP faced by PAO Sovcomflot is to maximise the Company's shareholder value by expanding the industrial business portfolio (long-term contracts with a fixed high rate of return) in the segments of liquefied gas transportation and servicing of offshore hydrocarbon fields while retaining a leading position in the most strategically and economically attractive sectors of the tanker shipping industry.

The main quantitative targets established by the LDP were formulated as a set of financial and industry-specific key performance indicators (KPIs), with the targets approved for each of them for the effective term of the programme.

The results of implementation of the Sovcomflot Group LDP are subject to independent audit. The auditor’s opinion and main conclusions regarding implementation of the LDP are subject to disclosure in the annual report.

LDP 2018 results were audited by AO KPMG. On 2 April 2019, the audit gave a positive opinion. According to the audit opinion, the LDP implementation report is presented fairly, in all material respects, in conformity with the applicable laws, standards, and internal regulations of the Company, gives a true and fair view and is free from material misstatement.

2.3. STRATEGIC DECISION-MAKING STRUCTURE

Organisational and strategic decision-making structure is shown in the figure below.

Key strategy decisions are made at the Board of Directors level (approval of the strategy (LDP), approval of target KPIs, and controlling their implementation) with preliminary consideration by the Strategy Committee under the Board of Directors. Strategic Planning and Development Directorate is monitoring the implementation of Group Strategy, preparing relevant reports and executive summaries.
2.4. KEY PERFORMANCE INDICATORS OF THE LONG-TERM DEVELOPMENT PROGRAMME

The table below shows the attainment of targets set by the PAO Sovcomflot LDP for 2018 broken down by approved KPIs.

### Attainment of KPI targets set by the LDP in 2018

<table>

</tbody>
</table>

The main reasons for the deviation:

1. Significant changes in global geopolitics and in the macroeconomic and industrial environment that have taken place since the approval of the current version of LDP in 2014 and have affected the prospects for implementing the projects embedded in LDP.
2. Unfavourable freight market conditions: in 2018, freight rates plunged to the lowest levels in more than 20 years.
3. Later than planned commissioning of vessels due to delays in construction.

1. Except for Items 5, 9 and 10, target and actual KPI values are calculated using proportional consolidation of the results of joint venture operations according to the methodology approved by the Board of Directors on 10 December 2014 (Minutes No. 140 of the Board of Directors dated 12 December 2014).
The operating results achieved in 2018 attest to the advantages of the Company’s current business model, which provides for faster growth and consistent development in market segments with a high value added, such as the servicing of offshore projects and liquefied gas transportation, while maintaining leadership positions in individual conventional transportation segments. Participation in large oil and gas projects ensures stable revenue for Sovcomflot Group even in the situation of high market volatility.

### 3.1. PRODUCTION ACTIVITIES

#### 3.1.1. Composition of the fleet

As of 31 December 2018, the Group’s fleet included 144 vessels with a total deadweight of 12,443 thousand tonnes.

</tbody>
</table>

For more information about the fleet, broken down by division, see section 1.1. of this Report, Company’s profile. Detailed information about the vessels and their technical characteristics is available on SCF Group’s website in the List of vessels section.

Therefore, in 2018 the number of vessels in the Group’s fleet decreased by 4%. Its total deadweight decreased by 693 thousand tonnes or by 5.3%.

#### 10.2 YEARS is the average age of the SCF Group fleet

The average age of the Group’s fleet at the end of 2018 was 10.2 years, which is 12% less than the average for leading shipping companies (according to Clarkson).

**Age characteristic of the Group’s fleet as of 31 December 2018**

1. Including the fleet of joint ventures: 9 LR1 product carriers and 4 LNG carriers.
3.1.2. Fleet operation

Technical operation of SCF Group’s fleet is carried out by the Group companies integrated into a single system under the umbrella brand SCF Management Services.

The system covers all key regions for Sovcomflot. The head office is located in Dubai (UAE) and provides the management of foreign-flagged vessels. The division in St. Petersburg is responsible for the management of Russian-flagged vessels.

Main functions of SCF Management Services: organising fleet operations, controlling the technical condition of ships, repairs and modernisation, equipment service support as well as engineering support for new projects, supervision of ship construction and crewing services. Companies operating under the SCF Management Services brand also provide technical management services for ships of third-party owners.

The SCF fleet operates in accordance with the Integrated Safety Management System (the ISMS) in effect at Sovcomflot Group.

Sovcomflot Group manages the operation of the fleet based on the provisions of the Technical Policy. This policy is a set of measures and actions that enable the Group to achieve operational advantages in the maritime transportation and service market sectors.

US$348.2 MILLION

the amount of actual operating expenses in 2018 (down 8% from 2017)

In accordance with the ISMS, the Group strives to optimise the system of providing vessels with the required financial and material resources to maintain them in good working order, and also applies advanced methods to monitor and analyse the technical condition of each vessel and its equipment.

Dynamics of actual operating expenses for 2016-2018, ‘000 million

Within the structure of operating expenses the majority are attributable to crew upkeep (59.1%), while technical operation and modernisation account for 29.7%, insurance for 5.0%, lubes for 3.3%, and other operating expenses for 2.9%.

Under the ISMS the Group carries out regular maintenance and repairs of vessels, which is an essential precondition for their safe and reliable operation.

The Technical Policy stipulates:
- A five-year classification survey period in docks that facilitates optimising maintenance and repair work.
- A scheduled preventive maintenance plan for each vessel, approved in accordance with the class of vessel.
- Monitoring the technical condition of individual types of vessels and critical equipment to make sure that they comply with PAO Sovcomflot requirements.
- Maintaining the external appearance of each ship at a high level.

The Technical Policy also prescribes the following actions to ensure the high quality of maintenance and repair work on vessels and their equipment:
- Competitive selection of the most effective and qualified shipyards.
- Using certified spare parts from original manufacturers when replacing worn-out or faulty components of equipment.
- Inspection of ships by classification societies, which ensures a high degree of supervision over the technical condition of vessels.
- Implementation of a modernisation programme for vessels and shipboard equipment to comply with the requirements of flag administrations and international conventions, and improve ship merchantability.

Maintenance and repair of vessels, 2016-2018

<table>
<thead>
<tr>

<tr>
<td>Actual expenses for dry docking and repair of vessels (‘000 USD)</td>
<td>51,539</td>
<td>64,593</td>
<td>21,457</td>
</tr>
</tbody>
</table>

In 2018 24 vessels were dry docked and repaired (vs. 38 vessels a year earlier). One of the goals of the Group under the Technical Policy is to increase the intermediate survey period. In 2018 the intermediate survey for 30 vessels was carried out without dry-docking.

During the reporting period there were four operational accidents, which resulted in damage to hull structures and vessel equipment, and required the decommissioning of vessels for repairs. The Group works proactively to reduce the number of accidents and also performs a detailed analysis of incidents to prevent re-occurrence.

3.1.3. Operating results

Overall results for Sovcomflot Group

Key operating performance indicators improved in 2018 compared to 2017, despite the high volatility in the tanker markets and a sharp fall in freight rates. The main reason for that was measures taken to increase fleet performance, including renewal and modernisation of the fleet, a balanced freight policy, which ensures the effective use of the fleet in different phases of the tanker market, and cooperation with high-profile customers.

Time charter equivalent (TCE) revenue in 2018 increased by 1.6% compared to 2017, to US$1,074.7 million under IFRS against US$1,058 million in 2017. The Net earnings from vessels’ trading of the Group also increased (by 9.2%), to US$ 697.5 million.

US$1,074.7 MILLION

TCE revenue for 2018 (up 1.6% from 2017)

Sovcomflot Group cooperates with both foreign and Russian customers. In the reporting year the Group continued to meet Russian foreign trade requirements: its vessels participated in transportation of oil and petroleum products from different Russian ports, including Novorossysk, Murmansk, Primorsky, Ust-Luga, Prigorodnoye, and others. In addition, the Group’s vessels were used as floating storage units to facilitate the transhipment of export oil and petroleum products from river tanker vessels to sea tankers.

1. See the Glossary.
2. See the Glossary.
Fleet performance indicators by lines of business

The Group’s key operating performance indicators by main operating segments exhibited differently directed dynamics in 2018 - negative in conventional segments and positive in industrial segments.

1. The breakdown into segments is provided in accordance with the IFRS financial statements.
2. The breakdown into segments is provided in accordance with the IFRS financial statements.

3.2. INVESTMENT ACTIVITIES

3.2.1. Dynamics of investments

The investment activities of Sovcomflot Group are performed as part of the Long-Term Development Strategy of the Group. Every specific project is developed and evaluated according to the Company's internal regulations.

With due regard for the Group's strategic priorities, the Investment Programme chiefly focuses on the implementation of highly profitable industrial projects in the field of transportation of liquefied gas and the servicing of offshore hydrocarbon fields. In 2018 most investments were directed to these segments. Investments were also made in the repair and modernisation of the existing fleet of the Group.

In 2018 investment projects financing amounted to US$197.3 million, which is 12% less than in 2017.

The increase in TCE revenues in the segment of offshore services was driven by the commissioning of new vessels.

The increase in TCE revenues in the segment of liquefied gas transportation occurred mainly due to the fact that the Company commenced servicing a new industrial project in 2017 and continued operations under the project in 2018.

In the ‘Others’ segment, which in 2018 included two bulkers and two seismic research vessels, revenues declined by 27% compared to 2017, resulting in a loss from vessels’ trading of US$18.9 million. This result was due to unfavourable conditions in the global offshore seismic exploration market and the impact of certain other factors.

1. The vessels were ordered by a VEB-Leasing Group company and are to be subsequently transferred to SCF Group for operation after completion of construction.
2. Three vessels of the series were added to the fleet in 2017 and one in 2018.
3. The vessels were added to the fleet in 2017 and are to be subsequently transferred to SCF Group for operation after completion of construction.
4. Sovcomflot Group and Shell entered into long-term charter contracts for two vessels of the series in February 2018.
3.2.2. Implementation of investment projects - Key results

Dual-fuel Aframax tankers

In 2018 Sovcomflot put into operation three LNG-fuelled Aframax crude oil tankers - Gagarin Prospect, Lomonosov Prospect, and Mendeleev Prospect. These are the world’s first Aframax tankers specially designed to use LNG as the primary fuel. Another two similar vessels, Koroiev Prospect and Venedikov Prospect, were added to the Group’s fleet by the end of 1Q 2019. The sixth vessel of the series, Samuel Prospect, is under construction.

The series of SCF’s ‘green’ tankers has set a new standard of environmental sustainability in the maritime shipping industry. The tankers’ main engines, auxiliary engines, and boilers are dual-fuel (using conventional ship fuel and LNG). In addition, these vessels are fitted with Selective Catalytic Reduction (SCR) technology, which enables compliance with Tier III regulations governing NOx emissions (Annex VI to the International Convention for the Prevention of Pollution from Ships) even when running on diesel fuel. SCF’s ‘green’ tankers with a deadweight of 114,000 tonnes each have a hull with a high ice class (1A). In February 2018 Sovcomflot Group and Shell entered into long-term charter-agreements for two vessels of the series. Shell also provides LNG bunkering.

SCF’s initiative was highly appreciated by industry experts: in December 2018 Sovcomflot Group won the Environment Award at the Lloyd’s List Global Awards 2018.

In January 2018 Sovcomflot Group entered into a credit facility agreement with a consortium of three European banks to finance the construction of a Fifth-generation Atlanticmax LNG carrier, which will be operated under a long-term contract with Shell. The new vessel will have a capacity of 174,000 cubic metres of LNG and will feature an upgraded Mark III Flex cargo system. The vessel will be fitted with two low-speed, dual-fuel X-DF engines. Such a propulsion plant is more reliable and requires less time and resources for planned repairs compared to a dual fuel diesel electric engine (DFDE). This type of gas carrier consumes 30 % less bunker than fourth-generation gas carriers. A small amount of boil-off gas and a boil-off gas partial re-liquefaction system will enable the charterer to reduce cargo losses during long voyages and waiting time, giving vessels of this type a competitive advantage. In addition, two similar vessels to be employed under time charter agreements with Shell are being built to order for Sovcomflot Group.

3.2.3. Implementation of the shipbuilding programme

In November 2018 Sovcomflot Group has entered into a credit facility agreement with a consortium of three European banks to finance the construction of a Fifth-generation Atlanticmax LNG carrier, which will be operated under a long-term contract with Shell. The new vessel will have a capacity of 174,000 cubic metres of LNG and will feature an upgraded Mark III Flex cargo system. The vessel will be fitted with two low-speed, dual-fuel X-DF engines. Such a propulsion plant is more reliable and requires less time and resources for planned repairs compared to a dual fuel diesel electric engine (DFDE). This type of gas carrier consumes 30 % less bunker than fourth-generation gas carriers. A small amount of boil-off gas and a boil-off gas partial re-liquefaction system will enable the charterer to reduce cargo losses during long voyages and waiting time, giving vessels of this type a competitive advantage. In addition, two similar vessels to be employed under time charter agreements with Shell are being built to order for Sovcomflot Group.

In January 2018 Sovcomflot Group entered into a credit facility agreement with a consortium of three European banks to finance the construction of a Fifth-generation Atlanticmax LNG carrier, which will be operated under a long-term contract with Shell. The new vessel will have a capacity of 174,000 cubic metres of LNG and will feature an upgraded Mark III Flex cargo system. The vessel will be fitted with two low-speed, dual-fuel X-DF engines. Such a propulsion plant is more reliable and requires less time and resources for planned repairs compared to a dual fuel diesel electric engine (DFDE). This type of gas carrier consumes 30 % less bunker than fourth-generation gas carriers. A small amount of boil-off gas and a boil-off gas partial re-liquefaction system will enable the charterer to reduce cargo losses during long voyages and waiting time, giving vessels of this type a competitive advantage. In addition, two similar vessels to be employed under time charter agreements with Shell are being built to order for Sovcomflot Group.

A new Arctic shuttle tanker of the Shturnman Albanov series for the Novy Port project

In July 2017 Sovcomflot Group entered into a shipbuilding contract for an Arctic shuttle tanker with ice class Arc7 in continuation of the Shturnman Albanov series. Sovcomflot and Gazprom Neft, the project’s operator, have entered into a long-term time-charter agreement for the vessel under construction. The new Arctic shuttle tanker is scheduled to be delivered in October 2019.

Three shuttle tankers of the series, each with a deadweight of 42 thousand tonnes, are already employed on the project for the development of the Novy Port oil and gas condensate field. These vessels have no analogues in the world, as they can operate in the Arctic sea year-round at temperatures down to – 45°C, and their draft enables them to manoeuvre freely in the shallow Gulf of Ob.

Ice-breaking platform supply vessel Yevgeny Primakov

In January 2018 Sovcomflot Group put into operation the standby vessel with ice class Icebreaker ICE-15 Yevgeny Primakov, the fourth in the series of multifunctional icebreaking vessels built to order for SCF Group to service offshore platforms of the Sakhalin-2 project (the Sea of Okhotsk). Today these vessels are among the best in their class. They were designed by taking into account the difficult navigation and ice conditions in the Sea of Okhotsk.

In 2014 Sovcomflot Group and Sakhalin Energy entered into time charter agreements providing for operation of all four vessels under the project during 20 years. In total, seven SCF’s multifunctional icebreaking support and supply vessels are employed in the Sakhalin-2 project. Sovcomflot Group is the world’s leader by the number of such vessels.

In February 2019 Offshore Support Journal, an international trade publication, named Yevgeny Primakov the winner of the Support Vessel of the Year category.

Fifth-generation Atlanticmax LNG carriers

In 2018 Sovcomflot Group’s shipbuilding programme included 15 vessels of four different types, including those intended for the Sakhalin-2 and Novy Port projects.

During the reporting period, Sovcomflot Group put into operation four new vessels with a total deadweight of about 140 thousand tonnes: a multifunctional icebreaking vessel and three dual-fuel Aframax tankers.

As at 31 December 2018 Sovcomflot Group’s order portfolio included nine vessels, with a total deadweight of 858,000 tonnes.
Shipbuilding portfolio of the Group as at 31 December 20181

3.3. INNOVATIVE ACTIVITIES AND R&D

3.3.1. Areas of innovative activities

Sovcomflot is a world leader in developing and implementing innovations in the field of maritime transport. The Groups is actively and consistently improving technologies and equipment, implementing international best practices, improving fleet management and enhancing the scientific potential of employees, including seafarers and land-based specialists.

Sovcomflot's innovative activities are carried out in accordance with the requirements and methodological guidelines of the Federal Agency for State Property Management (Rosimushchestvo), the Russian Ministry of Economic Development and the Council for Economic Modernisation and Innovative Development under the President of the Russian Federation. Priority directions for innovative development of the Group are determined in accordance with Decree No. 899 of the President of the Russian Federation dated July 7, 2011.

The main areas of innovative activities and scientific, R&D and technological projects of Sovcomflot Group are as follows:
- Developing the shipowner's technical specifications for Aframax tankers with dual-fuel main engines;  
- Designing vessels capable of operating in the most challenging winter conditions in the North Atlantic for an extended service life of 25 years (equivalent to a 40-year service life of a vessel operating in other parts of the world's oceans);  
- Factorising in new shipbuilding regulations into strength calculations and fatigue characteristics of hull structures. Conducting research, calculations and experiments to select optimal parameters for ship power plants in terms of energy efficiency and environmental impact reduction, as well as to select optimal hull shapes and parameters for propeller-nacelle systems.

Sovcomflot stimulates professional development among its staff and encourages employees to pursue additional education in order to gain in-depth knowledge of modern technologies used in fleet operations. Our engineering staff have high scientific potentials: currently, 17 seafarers, who completed post-graduate studies and received the title of Candidate of Technical Sciences or are preparing to defend their theses, work in the Company's fleet.

Key achievements in innovation and R&D

At the end of 2018, an operational centre for real-time vessel tracking was opened at the Sovcomflot headquarters in St. Petersburg.

The centre performs the following tasks using artificial intelligence:
- Controlling and analysing navigation safety data.
- Optimising ship routes taking into account hydrodynamics, weather conditions, and business objectives.
- Monitoring the ship's operation in real time (collecting and processing the ship's navigation and technical performance parameters, video feeds from surveillance cameras).
- Voyage planning: selecting electronic maps and guides, preparing a request and ordering maps for a voyage.
- Special Arctic navigation control capabilities: analysis of meteorological and ice conditions and movements of ships, identification of hazardous ice formations and areas with difficult ice conditions, development of recommendations for masters and determination of the safest route in ice conditions.
- Control and analysis of the performance of the ship's systems in terms of energy efficiency, bunker consumption, etc.
- Remote access to the ship's systems, log of faults, etc. for onshore specialists to analyse the technical condition of the ship in case of malfunctions in ship systems and help crews to fix faults.

Key achievements in innovation and R&D

- Sovcomflot won the Environment Award – Individual Company at the Lloyd’s List Global Awards 2018. The initiative for using LNG as the primary fuel for large-capacity tankers was highly appreciated by experts. In 2018, Sovcomflot put into operation the world's first Aframax crude oil tankers specially designed to use LNG as the primary fuel.

Yevgeny Primakov, a multifunctional icebreaking platform supply vessel put into operation in January 2018, was named Support Vessel of the Year by Offshore Support Journal, an international trade publication. By the Decree of Russian President Vladimir Putin dated 2 March 2018 a group of seagoing personnel and employees of onshore units of PAO Sovcomflot was honoured with high state awards for major contribution to the implementation of the project for creating the world’s first icebreaking LNG tanker, Christophe de Margerie. The tanker was specially designed and built to order for Sovcomflot to enable the safe year-round transportation of liquefied gas for the Yamal LNG project. Operations under the project started in December 2017.

PAO Sovcomflot employees, in collaboration with specialists from the Central Research Institute of Automatics and Hydraulics and Bauman Moscow State Technical University, prepared a research paper on the topic ‘Development of technological solutions enabling the creation of an autonomous system for safe and reliable navigation in the most challenging zones of the Gulf of Ob’. The research was performed as part of the international competition of scientific, scientific-technical and innovative developments aimed at the development and exploration of the Arctic and continental shelf in 2018, conducted with the support of the Government of the Russian Federation. The paper won the first prize at the competition.

- A new edition of a unique training manual, Practical Recommendations by SCF Captains for Vessel Management under Ice Conditions, was prepared in 2018. The author team is comprised of ice captains of Sovcomflot ships that participated in the implementation of industrial Arctic projects. The manual is based on the consolidated and systematised experience gained in working on the Sakhalin-1, Varandey, Prirazlomnoye and Novy Port projects. In the new edition, practical recommendations on the use of Abpoid propulsion units to manoeuvre Arctic shuttle tankers were complemented by experience in using them in heavy ice conditions in the Kara Sea and the Gulf of Ob. The updated manual was published and distributed to the SCF fleet and Russian maritime universities and training centres in January 2019.
- 2018 marks ten years since SCF vessels began servicing the Varandey Project. The Company’s participation in the project was recognised by the Russian Government award in science and technology "for the development and industrial implementation of innovative scientific, methodological and technological solutions for the establishment of an oil transportation system in the seas of the Arctic Ocean". This involves the construction and operation of a unique series of Vasily Dinkov-class Arctic shuttle tankers. In 2008, the tanker Vasily Dinkov was also among the finalists for the prestigious Ship of the Year award from leading shipping publication Lloyd’s List.

1. Hulls 131110 and 131120 were ordered by a VSB-Leasing Group company and are to be subsequently transferred to SCF Group for operation after completion of construction.
Financing of innovative activities

The financing of R&D, engineering activities, professional training, retraining and skill improvement of PAO Sovcomflot personnel in 2018 amounted to USD5.5 million.

Structure of R&D expenses in 2018, %

- The level of operating expenses per vessel, determined as a percentage of industry average (based on data from independent analytical sources). The target is less than 100%.
- The level of vessel crew costs, determined as a percentage of industry average (based on data from independent analytical sources). The target is less than 100%.

### 3.4. FINANCIAL RESULTS

#### 3.4.1. Key financial indicators

In 2018 the tanker market remained at one of the lowest levels in the past 25 years. However, in 4Q 2018 there appeared some signs of recovery in freight rates in the tanker market due to a slight increase in cargo base and demand for energy shipping. Against this background, measures taken to diversify the fleet with a focus on the development of industrial business, as well as the Group’s balanced freight policy, enabled the Group to maintain a stable financial position in the reporting period.

The financial statements of Sovcomflot Group were prepared according to IFRS and disclosed online. Below is a brief overview and analysis of the key financial indicators of the Group.

- The book value of vessels in operation decreased by 2% from US$6,291.3 million at the end of 2017 to US$6,167.5 million at the end of the reporting period. Total assets of the Group amounted to US$7,142.2 million as at 31 December 2018. The share capital at the end of 2018 was US$3,350.1 million, down 1.7% from 2017.

### US$7,142.2 MILLION

the amount of the SCF Group’s assets at the end of 2018

The Group maintains a stable programme of capital investments during all phases of the shipping cycle. Investments in fleet construction in 2018 totalled US$379.3 million (2017: US$556.7 million), with the amount payable under current shipbuilding contracts in 2018 2019-2021 at the end of 2018 being US$7,142.2 million. The investment programme and operating activities were financed through secured bank loans (as at 31 December 2018, total debt to banks amounted to US$2,575.5 million thousand), proceeds from the placement of unsecured Eurobonds amounting to US$690.3 million, and operating cash flow. Despite the continued volatility in financial markets and the unstable geopolitical and economic situation in the world, the Group retained access to both foreign and Russian debt capital markets.

### 3.4.2. Income statement indicators

The historically low tanker market negatively affected SCF Group’s results in 2018, but thanks to the recovery in freight rates in the conventional segment, which began in the fourth quarter, TCE revenues amounted to US$1,074.7 million, up 1.6% from the previous period.

3. See the definition in the glossary.

The Group concludes seven new credit facility agreements for a total amount of US$ 866 million. Proceeds under these agreements were used to finance the construction of new vessels and refinance existing credit liabilities. The company also drew down funds under previously concluded credit facility agreements to finance the delivery of new vessels in the reporting year. In the reporting year, the Group's borrowers and guarantors fully complied with all requirements and terms ("covenants") of corresponding credit facility agreements.

The Group’s current leverage corresponds to the industry average, which is traditionally impacted by high capital intensity of investments and volatility of the freight market.

Financial statements are available online:

**Consolidated Financial Statements in Roubles and Auditor’s Report**

**Consolidated Financial Statements in U.S. Dollars and Auditor’s Report**

**Accounting (Financial) Statements and Auditor’s Report**

### US$1,519.9 MILLION

the revenue generated in 2018 (up 5.9% from 2017)

In 2018, the Group demonstrated the high stability of its industrial business model and recorded a US$6.9 million profit adjusted for impairment charges on vessels and non-operating expenses versus a loss of US$5.3 million in 2017. In accordance with IFRS, in 2018 the company recognised impairment provisions of US$49.3 in relation to the fleet and other assets, resulting in a total net loss of US$45.6 million.

### US$580.7 MILLION

the EBITDA for 2018 (6.5% higher than in 2017)
In the reporting year the Group continued to implement consistently its industrial development strategy aimed at expanding the offshore and gas business segments, whose share of time charter revenue reached 57%, with revenues from the conventional fleet operations (transportation of crude oil and petroleum products) accounting for 40%. The maximisation of income from the high-margin industrial business portfolio allowed for the negative impact of fleet performance in the conventional market to be minimised.

The implementation of a cost optimisation programme in 2018 allowed achieving 10% reduction in direct operating expenses, which amounted to US$ 377.2 million. An 18% increase in voyage expenses and commissions to US$445.2 million was due to a rise in bunker fuel prices and an increase in the number of vessels employed in the spot market. General and administrative expenses decreased by 4% to US$111.8 million. Net financing expenses increased to US$192.2 million amid a general rise in the prime rate in USD and an increase in the Company’s loan liabilities associated with the financing of new shipbuilding.

### 3.4.3. Liquidity indicators

The Group has a strong liquidity position, which represents a significant positive factor for maintaining the Company’s creditworthiness and financial stability. Available cash balances in bank accounts and deposits totalled US$267.6 million at the end of 2018, which is in line with the Group’s cash management policy. The Group also had unused revolving credit facilities of US$76.0 million and available special-purpose credit facilities for new builds of US$360.2 million. Thus, the Company’s current liquidity as at 31 December 2018 totalled US$703.8 million. The Company’s liquidity at the end of 2018 fully covers the current investment commitments under the existing shipbuilding programme for 2019 amounting to US$341.1 million.

### 3.4.4. Credit rating of the Group

During 2018 Sovcomflot Group continued to work with international credit rating agencies.

Moody’s Investors Service affirmed the Group’s credit rating at Ba1 with a stable outlook. Fitch Ratings reaffirmed the Group’s rating at BB with a positive outlook. S&P Global Ratings maintained the current credit rating for the Group at BB+ with a stable outlook.

Corporate governance

The high development level of the corporate governance system at PAO Sovcomflot facilitates improvements in investment attractiveness and an increase in operational efficiency. The planned public capital markets entry makes the development of corporate governance practices a priority task for PAO Sovcomflot.

4.1. Corporate governance system

PAO Sovcomflot seeks to ensure that its corporate governance system complies with international standards – this requires complete adherence to both legislative requirements and ethical standards in the spirit of best corporate governance practices. To this end, PAO Sovcomflot works actively to improve its corporate governance system taking into account the specifics of its operations.
List of local regulations in the field of corporate governance

- The Charter of PAO Sovcomflot (the new version was approved by Instructions No. 271-r of the Federal Agency for State Property Management dated 31 May 2017);
- Amendments to the Charter of PAO Sovcomflot (approved by Instructions No. 449-r of the Federal Agency for State Property Management dated 29 June 2018);
- Code of Corporate Governance (the new version was approved by the PAO Sovcomflot Board of Directors decision dated 10 November 2015, Minutes No. 147);
- Regulations on the General Meeting of Shareholders of PAO Sovcomflot approved by Instructions No. 310-r of the Federal Agency for State Property Management dated 16 June 2017;
- Regulations on the Board of Directors (the new version was approved by Instructions No. 449-r of the Federal Agency for State Property Management dated 29 June 2018);
- Regulations on the Strategy Committee of the Board of Directors (approved by the Board of Directors decision dated 5 February 2009, Minutes No. 95);
- Regulations on the Audit Committee of the Board of Directors (the new version was approved by the Board of Directors decision dated 26 May 2017, Minutes No. 163);
- Regulations on the HR and Compensation Committee of the Board of Directors (the new version was approved by the Board of Directors decision dated 26 May 2017, Minutes No. 163);
- Regulations on the Committee for Innovative Development and Technical Policy (approved by the Board of Directors decision dated 25 February 2011, Minutes No. 109);
- Regulations on the Executive Board (approved by Instructions No. 838-r of the Federal Agency for State Property Management dated 10 June 2009);
- Regulations on the Chief Executive Officer (approved by Instructions No. 696-r of the Federal Agency for State Property Management dated 10 June 2014);
- Regulations on the Auditing Commission (the new version was approved by Instructions No. 519-r of the Federal Agency for State Property Management dated 30 June 2016);
- Regulations on the Internal Audit Department of PAO Sovcomflot (the new version was approved by the Board of Directors decision dated 26 May 2017, Minutes No. 163);
- Regulations on the Corporate Secretary of PAO Sovcomflot (approved by the Board of Directors decision dated 11 April 2017, Minutes No. 162);
- Dividend Policy (approved by the Board of Directors decision dated 14 December 2012, Minutes No. 125).

Improvement of the corporate governance system

The Company recognises the importance of a high level of corporate governance. The Company's corporate governance system is based on Russian statutory requirements and applicable international best practices of corporate governance. The basic document that sets forth the key principles and elements underlying the Company's corporate governance system is the PAO Sovcomflot Corporate Governance Code. The initial version of the PAO Sovcomflot Corporate Governance Code (the Code of Corporate Conduct) was approved by the Board of Directors on 22 February 2007 (Minutes No. 80). The current version of the PAO Sovcomflot Corporate Governance Code was developed on the basis of the Federal Law on Joint-Stock Companies, the Charter and other internal documents of the Company; recommendations of the Corporate Governance Code approved by the Bank of Russia (Bank of Russia Letter No. 06-52/2463 dated 10 April 2014), recommendations of the Principles of Corporate Governance of the Organisation for Economic Cooperation and Development (OECD) and the listing requirements of Russian and foreign stock exchanges, and was approved by the PAO Sovcomflot Board of Directors decision dated 10 November 2015 (Minutes No. 149).

The Corporate Governance Code is a set of rules, standards, and internal regulations, which are used by PAO Sovcomflot in the course of its activities, and which are based on a balanced consideration of the interests of the Company's shareholders, management bodies and other stakeholders. The goal of the Corporate Governance Code is to ensure a high level of corporate governance and professional and business ethics necessary to achieve the strategic goals and objectives determined by the Charter and other internal documents of the Company.

The basic principles of corporate governance in the Russian Federation are defined in the Corporate Governance Code (the "CG Code") approved by the Bank of Russia and recommended for use by joint-stock companies. Based on the results of the assessment performed by the Company to evaluate compliance with the CG Code recommendations, it was determined that PAO Sovcomflot complied with most recommendations:
- in 2016 the Company fully observed 70.14% and partially observed 26.86% of the CG Code principles. The overall observance rate was 97.0%;
- in 2017 the Company fully observed 83.58% and partially observed 14.92% of the CG Code principles. The overall observance rate was 98.5%.

98.5%

the overall observance rate of the CG Code principles, which is above the threshold recommended by the Federal Agency for State Property Management (95 %) and reflects the high level of corporate governance in the Company

The Company has had a Corporate Governance Code since 2017, and a Corporate Governance Code fully aligned with the CG Code recommended by the Bank of Russia since 2015.

At least three independent directors have been elected to the Company's Board of Directors since 2008.

Since 2006 PAO Sovcomflot has taken out liability insurance for members of the Board of Directors and management.

The Board of Directors has established a strategy committee, an audit committee and an HR and compensation committee operating since 2008 and an innovation development and technical policy committee operating since 2011.

Since 2006 the Company has been publicly disclosing its audited IFRS consolidated financial statements in accordance with the requirements of rating agencies and stock market regulators (the Company has been preparing and disclosing its audited IFRS financial statements to the shareholders and creditors since 1988).

Since 2012 the Company has been publicly disclosing information in accordance with the statutory disclosure requirements.

From 2010 one of the Sovcomflot Group companies has been an issuer of securities (bonds) listed on the London and Irish stock exchanges and meeting the requirements established by the U.S. Securities and Exchange Commission for offering to U.S. investors under Rule 144A.

PAO Sovcomflot is continuously improving its corporate governance system, taking into account the CG Code recommendations and the relevant best global practices of corporate governance.

In the reporting year the Company continued work to improve the corporate governance model and practices. In accordance with the road map for implementing the CG Code at PAO Sovcomflot, approved by the Board of Directors in 2015, the following key internal documents that set forth the principles of corporate governance were updated (or re-approved):
- Amendments to the Charter of PAO Sovcomflot and Regulations on the PAO Sovcomflot Board of Directors. These documents were updated to reflect recommendations of the CG Code, as well as the specifics of the Company's operations.

The results of the CG Code implementation in accordance with the road map were reviewed by the Company's Board of Directors in 2018.

Mechanisms for managing sustainable development and social responsibility

Mechanisms related to managing sustainable development and social responsibility are embedded in the PAO Sovcomflot corporate governance system. In the course of their activities, governing bodies consider a number of issues, including those related to occupational health and safety, HR management, charity work, environmental protection, etc.

The Company's anti-corruption policy

PAO Sovcomflot, through its governing bodies and employees, ensures compliance with the requirements of current legislation of the Russian Federation on countering corruption, including measures to prevent and combat corruption offences. The Company has an approved Anti-Corruption Policy and a hot line operating since 2013.

In 2017 the PAO Sovcomflot Executive Board made a decision on the Company's accession to the Anti-Corruption Charter of Russian Business to implement measures aimed at preventing and combating corruption and create conditions for public condemnation and rejection of corruption in dealings with government authorities and in corporate relations. The Company was included in the consolidated register of parties to the Anti-Corruption Charter of Russian Business by the order of the President of the Russian Union of Industrialists and Entrepreneurs dated 14 November 2017.

Resolution of conflicts of interest in the Company

The general policy for regulating conflicts of interest involving PAO Sovcomflot is determined by its Board of Directors. The mechanism for notifying the management bodies of PAO Sovcomflot of any conflicts of interest is determined by the Regulations on the Board of Directors, as well as the current Corporate Governance Code. The Company has an approved policy governing interested party transactions in Sovcomflot Group that has been in effect since 2015, which also provides for a mechanism for resolving conflicts of interest in the Group.

1. As of 31 December 2018
4.2. GENERAL MEETING OF SHAREHOLDERS

In accordance with Clause 5 of the Regulations on the Management of the Federally Owned Shares of Open Joint-Stock Companies and Exercising the Special Right for the Participation of the Russian Federation in the Management of Open Joint-Stock Companies (the "Golden Share") approved by Russian Government Resolution No. 738 dated 3 December 2004, the rights of the shareholder – the Russian Federation – are exercised by the Federal Agency for State Property Management, as agreed with the Russian Ministry of Transport.

On 29 June 2018, the PAO Sovcomflot Annual General Meeting of Shareholders was held (Instructions No. 519-r of the Federal Agency for State Property Management dated 29 June 2018), which adopted the following resolutions:

- Approve the 2017 annual report of PAO Sovcomflot;
- Approve the annual accounting (financial) statements of PAO Sovcomflot for 2017;
- Approve the following distribution of the net profit of PAO Sovcomflot for 2017 amounting to RUB 3,391,590 thousand:
  - for payment of dividends on the shares of PAO Sovcomflot for 2017: RUB 1,696,000 thousand;
  - earnings to be retained by PAO Sovcomflot: RUB 1,695,390 thousand;

- Pay the dividends on the ordinary shares of PAO Sovcomflot based on 2017 performance in the amount of RUB 1,696 million, which equates to 0.862355949 rubles per ordinary registered share of PAO Sovcomflot, and set the 10th day following the date of the decision to pay dividends as the dividend record date;
- Elect members of the PAO Sovcomflot Board of Directors and Auditing Commission;
- Pay compensation to the members of the PAO Sovcomflot Board of Directors who are non-government officials in the amount determined in accordance with the Company’s internal documents;
- Approve Ernst & Young LLC as the auditor of PAO Sovcomflot for 2018;
- Approve amendments to the Charter of PAO Sovcomflot and the revised version of the Regulations on the PAO Sovcomflot Board of Directors.

At the extraordinary general meeting of shareholders of PAO Sovcomflot held on 1 March 2018 (Instructions No. 95-r of the Federal Agency for State Property Management dated 1 March 2018) it was decided to cancel the placement of equity securities of an additional issue - 280,956,743 ordinary registered uncertified shares with a nominal value of 1 rouble each - registered by the Bank of Russia on 12 March 2015 (state registration number of the issue: 1-91-10615-A). It was also decided again to increase the authorised capital of PAO Sovcomflot by placing additional ordinary registered shares (the ‘Shares’) on the following terms:
- the number of securities to be placed: 280,956,743;
- nominal value: 1 rouble each;
- procedure for determining the placement price of the shares: the placement price of the additional shares (one Share), which shall not be below the nominal value, shall be determined by the Board of Directors of PAO Sovcomflot no later than the shares placement commencement date in accordance with Articles 56 and 77 of Federal Law No. 208-FZ "On Joint-Stock Companies" dated 26 December 1995 after the state registration of the additional issue of securities. The placement price of the Shares shall be disclosed in the manner to be established in the decision on additional issue of securities and the securities prospectus in accordance with Federal Law No. 39-FZ "On Securities Market" dated 22 April 1996 and applicable regulations;
- method of placement: public subscription;
- payment method: the shares shall be paid for in Russian rubles and/or US dollars (if payments in foreign currency are allowed by regulations at the time of payment) in a cashless way.

4.3. BOARD OF DIRECTORS OF PAO SOVCOMFLOT

4.3.1. Composition of the Board of Directors

An important role in the organisation of an effective corporate governance system is played by the PAO Sovcomflot Board of Directors, which is responsible for the strategic leadership of the Group’s activities and determines the vision, mission, and strategic development of the Group.

The members of the PAO Sovcomflot Board of Directors during the reporting period were elected:

1. By the Annual General Meeting of Shareholders dated 16 June 2017 (Instructions No. 310-r of the Federal Agency for State Property Management dated 16 June 2017) as follows:
   - Ivan Glumov (independent director)
   - Pavel Kadochnikov (government appointee)
   - Ilya Kletanov (government appointee)
   - Alexey Klyavin (independent director)
   - David Moorhouse (government appointee)
   - Viktor Olserys (government employee)
   - Sergey Frank (government appointee)
   - Walid Chammah (independent director)
   - Andrey Sharonov (independent director)

2. By the Annual General Meeting of Shareholders dated 29 June 2018 (Instructions No. 449-r of the Federal Agency for State Property Management dated 29 June 2018) as follows:
   - Ivan Glumov (independent director)
   - Ilya Kletanov (government appointee)
   - Alexey Klyavin (independent director)
   - David Moorhouse (government appointee)
   - Viktor Olserys (government appointee)
   - Oksana Tarasenko (government employee)
   - Sergey Frank (government appointee)
   - Walid Chammah (independent director)
   - Andrey Sharonov (independent director)

According to the Company’s Charter, 9 persons are elected to the Board of Directors, which meets the statutory requirements as well as the Company’s needs. The personal composition of the Board is determined by the General Meeting of Shareholders (a decision of the sole shareholder). Members of the Company’s Board of Directors are elected following a review of the candidates by the commission for selecting candidates to the governing bodies of companies with state participation, formed annually by the shareholder’s representative (Federal Agency for State Property Management) with the participation of the Russian Ministry of Transport, which enables the shareholder to receive information about the candidates necessary to get an idea of their personal and professional qualities.

Ilya Kletanov was elected Chairman of the PAO Sovcomflot Board of Directors according to the Board of Directors decisions dated 1 September 2017 (Minutes No. 165) and 23 July 2018 (Minutes No. 173).

Independent directors have been elected to the Board of Directors of PAO Sovcomflot annually since 2008, in accordance with the criteria established in the current Corporate Governance Code and in Russian Government Resolution No. 738. Four independent directors were elected to the Board of Directors (as at 31 December 2018): Alexey Klyavin, Ivan Glumov, Walid Chammah, and Andrey Sharonov.

2018–present: AO Medicine, Member of the Board of Directors;  

4.3.2 Activities of the Board of Directors in 2018  
The procedure for convening and holding meetings of the Board of Directors is regulated by the Regulations on the Board of Directors. The work of the Board of Directors is performed in accordance with its competences, as determined under the Federal Law on Joint-Stock Companies and the PAO Sovcomflot Charter.  

Given the strategic nature of the Board of Directors’ activities, meetings of the Board of Directors are held on a scheduled basis. A schedule of meetings is adopted at the first meeting following the election of the Board of Directors. The schedule includes matters that require regular consideration according to statutory and shareholder’s requirements. The Board of Directors also considers other matters at its meetings according to the requirements of the Company’s Charter and/or the law.  

In 2018 the PAO Sovcomflot Board of Directors convened nine times (including four meetings through joint attendance and five through absentee voting)².  

The Chairman of the PAO Sovcomflot Board of Directors, as a rule, elects a Chairman, whose powers are defined in the Regulations on the PAO Sovcomflot Board of Directors, and forms its committees.

---

² Date of the meeting and number of the minutes: 13 January 2018, No. 169 (absentee voting); 9 February 2018, No. 170 (absentee voting); 10 April 2018, No. 171; 10 May 2018, No. 172; 20 July 2018, No. 173 (absentee voting); 28 August 2018, No. 174 (absentee voting); 21 September 2018, No. 175 (absentee voting); 9 October 2018, No. 176; 11 December 2018, No. 177.
Information on the most significant issues was disclosed by PAO Sovcomflot as material facts.

The report on the work of the Board of Directors and its committees in 2018 is planned to be reviewed at the meeting of the PAO Sovcomflot Board of Directors to be held in April 2019 in person. The self-assessment conducted by the Board of Directors and its committees determined that the performance of the Company’s Board of Directors and its committees corresponded to the needs for the Company’s development.

When considering issues within their competence, the committees arrange for a detailed analysis of drafts proposed by management and the preparation of recommendations for the Board of Directors, thereby improving the quality of the decision-making process. The committees operate on the basis of respective regulations approved by the Board of Directors.

### Report on the work of the HR and Compensation Committee

During the reporting period two compositions of the Committee were in operation: elected by the PAO Sovcomflot Board of Directors decision dated 31 July 2017 (Minutes No. 164) and elected by the PAO Sovcomflot Board of Directors decision dated 20 July 2018 (Minutes No. 173).

In 2018 the Committee considered and prepared recommendations for the Board of Directors based on the results of implementation of the long-term development strategy of PAO Sovcomflot and also reviewed issues related to the updating of the PAO Sovcomflot strategy up to 2025.

During the reporting period Strategy Committee members held working meetings with PAO Sovcomflot's management on matters related to updating the long-term development programme of PAO Sovcomflot.

### Report on the work of the Audit Committee

During the reporting period two compositions of the Committee were in operation: elected by the PAO Sovcomflot Board of Directors decision dated 31 July 2017 (Minutes No. 164) and elected by the PAO Sovcomflot Board of Directors decision dated 20 July 2018 (Minutes No. 173).

In 2018 the Committee considered and prepared recommendations for the Board of Directors for determining the amount of compensation and principles of awarding bonuses to the Company’s Corporate Secretary, carrying out a preliminary assessment of the work of the Company’s Corporate Secretary based on annual results. Elaborating recommendations to the Board of Directors for determining the amount of compensation and principles of awarding bonuses to the Company’s Corporate Secretary, carrying out a preliminary assessment of the work of the Company’s Corporate Secretary based on annual results. Elaborating recommendations to the Board of Directors for determining the amount of compensation and principles of awarding bonuses to the Company’s Corporate Secretary, carrying out a preliminary assessment of the work of the Company’s Corporate Secretary based on annual results.

During the reporting period members of the Committee held regular working meetings with the auditors and the financial and accounting departments of PAO Sovcomflot.

### Report on the work of the Strategy Committee

During the reporting period two compositions of the Committee were in operation: elected by the PAO Sovcomflot Board of Directors decision dated 31 July 2017 (Minutes No. 164) and elected by the PAO Sovcomflot Board of Directors decision dated 20 July 2018 (Minutes No. 173).

The Committee prepared recommendations for the Board of Directors regarding approval of performance indicators and the results of their attainment by the executive bodies in implementing the long-term development programme of PAO Sovcomflot, and also considered amending the Company’s internal documents related to employee compensation.

During the reporting period members of the Committee held regular working meetings on the above issues with members of the PAO Sovcomflot collegiate executive body.

### Report on the work of the Committee for Innovative Development and Technical Policy

During the reporting period two compositions of the Committee were in operation: elected by the PAO Sovcomflot Board of Directors decision dated 31 July 2017 (Minutes No. 164) and elected by the PAO Sovcomflot Board of Directors decision dated 20 July 2018 (Minutes No. 173).

During the reporting period members of the Committee held regular working meetings with corresponding PAO Sovcomflot structural divisions on issues relating to the implementation of the innovative development programme.
4.4. CHIEF EXECUTIVE OFFICER AND EXECUTIVE BOARD OF PAO SOVCOMFLOT

The executive management bodies of PAO Sovcomflot manage the Company’s day-to-day activities.

Sole executive body

Collegiate executive body

Chief Executive Officer

Executive Board

Sergey Frank was elected Chief Executive Officer on 4 October 2004 by an Extraordinary General Meeting of Shareholders of PAO Sovcomflot. The powers of Sergey Frank as PAO Sovcomflot Chief Executive Officer were extended for five years by a resolution of the Extraordinary General Meeting of Shareholders (Instructions No. 432-r of the Federal Agency for State Property Management dated 19 June 2015).

The rights and obligations of the Chief Executive Officer and members of the Executive Board on managing the current activities of PAO Sovcomflot are determined by Federal Law No. 208-FZ “On Joint-Stock Companies” dated 26 December 1995, other legal acts of the Russian Federation, the Charter, Regulations on the Management Bodies and internal regulations of PAO Sovcomflot, as well as contracts determining the rights and obligations of the Chief Executive Officer and members of the Executive Board concluded by each of them with PAO Sovcomflot.

The Chief Executive Officer exercises the functions of Chairman of the Executive Board, acts without a power of attorney on behalf of PAO Sovcomflot, and approves internal regulations governing production, technological, financial, accounting, business, HR, and occupational health and safety issues.

The Executive Board operates within the limits of its competence determined by the Charter and ensures the implementation of resolutions of General Meetings of Shareholders and Board of Directors of PAO Sovcomflot.

Information on members of the PAO Sovcomflot Executive Board (as at 31 December 2018)

Born in 1969
Education: Southampton University
25 years of experience in the industry and in SCF Group
During the reporting period the PAO Sovcomflot Board of Directors also included Yury Tsvetkov. His powers as a member of the PAO Sovcomflot Executive Board were terminated on 9 October 2018 in connection with his appointment as Deputy Minister of Transport of the Russian Federation.

The Chief Executive Officer and members of the Executive Board of PAO Sovcomflot did not own shares in the Company during the reporting period, nor made any transactions for the acquisition or disposal of Company shares.

Based on a decision of the Executive Board, the following committees have been established and operate at Sovcomflot to preliminarily consider issues and prepare recommendations for the Executive Board and Chief Executive Officer:

- Committee for Maritime Safety, Environmental Protection, Quality and New Technologies
- Finance Committee
- Investment and Asset Management Committee
- Freight Committee
- Committee for Corporate Identity and Public Relations
- Committee for Social and HR Policy and Corporate Ethics
- Committee for Information Technologies
- Insurance Committee
- Committee for Technical Policy – Technical Council

Three out of the 55 meetings of the Executive Board were held by absentee voting. A total of 140 issues were considered at the Executive Board meetings in 2018.

The Executive Board adopted decisions on the following main areas of activity of PAO Sovcomflot at its meetings in 2018:

- Implementing the development strategy of Sovcomflot Group;
- Renewing the Sovcomflot Group fleet and expanding the Group’s participation in industrial projects;
- Improving the corporate and organisational structure of the Group;
- Expanding the social guarantees and benefit packages for fleet and onshore personnel;
- Charitable and sponsorship programmes of PAO Sovcomflot and Sovcomflot Group;
- Approval of internal documents falling within the competence of the Executive Board.
4.5. AUDITING COMMISSION

The Auditing Commission exercises control over the financial and business activities of PAO Sovcomflot, as well as its divisions and services.

The competence and operating procedures of the Auditing Commission are determined by the Regulations on the Auditing Commission approved by the PAO Sovcomflot General Meeting of Shareholders (Instructions No. 519-r of the Federal Agency for State Property Management dated 30 June 2016).

During the reporting period, the Auditing Commission operated in the following compositions, which were elected:
- by the Annual General Meeting of Shareholders dated 29 June 2018 (Instructions No. 449-r of the Federal Agency for State Property Management dated 29 June 2018) as follows: Ivan Bezmenov, Dmitry Vladimirov, Zakhary Dzhioev, and Mikhail Kuznetsov;

Composition of the Auditing Commission of PAO Sovcomflot as at 31 December 2018

**Chairman of the Auditing Commission**
- Mikhail Kuznetsov
  - Born in 1989
  - Education: higher
  - OOO Topcompetence, Chief Executive Officer; OOO Corporate Development Centre, Chief Executive Officer

**Members of the Auditing Commission**
- Ivan Bezmenov
  - Born in 1980
  - Education: higher
  - Russian Ministry of Economic Development, Director of the Corporate Governance Department
- Dmitry Vladimirov
  - Born in 1989
  - Education: higher
  - Federal Agency for State Property Management, Deputy Head of the Department of Property Relations and Privatisation of Major Organisations
- Zakhary Dzhioev
  - Born in 1977
  - Education: higher
  - Federal Agency for Marine and River Transport, Head of the Department of Economics and Finance

During the reporting period members of the Auditing Commission did not own shares in PAO Sovcomflot.

In 2018, compensation was paid to the members of the Auditing Commission other than state officials in accordance with the Regulations on the Payment of Compensation and the Reimbursement of Expenses to Members of the PAO Sovcomflot Board of Directors approved by Instructions No. 449-r of the Federal Agency for State Property Management dated 29 June 2018 and on the basis of Instructions No. 449-r of the Federal Agency for State Property Management dated 30 June 2016 and on the basis of Instructions No. 519-r of the Federal Agency for State Property Management dated 29 June 2018. All recommendations of the PAO Sovcomflot Auditing Commission based on the audit of financial and economic activities were implemented during the reporting period.

4.6. COMPENSATION SYSTEM FOR MEMBERS OF MANAGEMENT BODIES

4.6.1 Compensation of the Board of Directors members in 2018

In accordance with recommendations of the Russian Ministry of Economic Development and the Regulations on the Payment of Compensation and the Reimbursement of Expenses to Members of the PAO Sovcomflot Board of Directors, the directors of PAO Sovcomflot are paid compensation during their term of office for exercising their duties as Board of Directors members, with basic compensation set at RUB 3,200,000 a year. Compensation in the following amounts is paid each year in addition to basic compensation for the directors serving as Chairman of the Board of Directors, Chairman of a Committee of the Board of Directors, and Member of a Committee of the PAO Sovcomflot Board of Directors:
- For exercising the duties of the Chairman of the Board of Directors, in the amount of the basic compensation multiplied by a coefficient of 2.3.
- For exercising the duties of the Chairman of a Committee of the Board of Directors, in the amount of the basic compensation multiplied by a coefficient of 0.8.
- For exercising the duties of a Member of a Committee of the Board of Directors, in the amount of the basic compensation multiplied by a coefficient of 0.6.

Compensation amounts paid on top of the basic compensation are paid regardless of the number of PAO Sovcomflot Board of Directors Committees on which the member of the Board of Directors works.

Compensation is not paid to Board of Directors members who are employees of PAO Sovcomflot or state officials and to other individuals who are not entitled under Russian law to compensation.

In accordance with the above Regulations on the Payment of Compensation and the Reimbursement of Expenses to Members of the PAO Sovcomflot Board of Directors and Instructions No. 449-r of the Federal Agency for State Property Management dated 29 June 2018, PAO Sovcomflot Board of Directors members were paid compensation and reimbursement for expenses in the amount set forth in internal documents of PAO Sovcomflot.

2. More detailed information about these regulations can be found on the Company’s website in the Corporate governance section.
4.6.2 Compensation of Executive Board members and the Chief Executive Officer in 2018

The Personnel Compensation Policy, as an integral part of the Company’s HR management system, is aimed at preserving, enhancing, developing and unlocking the Company’s staff potential, increasing labour productivity and loyalty of employees, and ultimately achieving the objectives defined by the Company’s business strategy.

The compensation of the PAO Sovcomflot Executive Board members consists of:

- A fixed component (monthly salary);
- A variable component (compensation based on the Company’s annual performance).

The size of a monthly salary is established by the employment contracts concluded at the time of employment.

Compensation based on the Company’s annual performance is directly linked to the attainment of a number of key performance indicators defined according to the Long-Term Development Programme. The payment of annual bonuses acts as an incentive to attain the strategic goals of PAO Sovcomflot, and also serves to attract and retain the best industry specialists.

Starting from 1 January 2015, members of the Executive Board and some of seagoing and onshore personnel are participating in the Long-Term Motivation Programme (LTMP) approved by the Board of Directors.

The Company’s LTMP was developed in accordance with best industry practices in incentive compensation and enables the Company to attract and retain high-profile fleet management professionals, including masters and chief engineers who have unique competencies in ensuring a safe, reliable and quality transportation of energy resources and servicing of offshore oil & gas projects as well as an extensive experience of work on high-tech vessels in difficult climate and weather conditions.

The total duration of the LTMP is five years with remunerations to be paid in 2018, 2019 and 2020.

In accordance with the LTMP, employees are entitled to receive remuneration upon the attainment of target key performance indicators (KPI targets) defined in the Company’s Long-Term Development Programme. If KPI targets are not attained, entitlements accrued in accordance with the LTMP terms and conditions may be cancelled.

Target KPIs determining the contribution of Executive Board members to implementing the PAO Sovcomflot LDP for the 2018 financial year were approved by the Board of Directors decision dated 12 December 2017 (Minutes No. 168).

PAO Sovcomflot did not receive government support, including subsidies.

---

1. The new version was approved by the PAO Sovcomflot Board of Directors decision dated 10 November 2015, Minutes No. 149.
### 4.8.1. RISK MANAGEMENT SYSTEM AND INTERNAL CONTROL

**4.8.1.1. Risk management system**

Sovcomflot Group pays particular attention to risk management issues. Management and employees of all levels are responsible for establishing and operating a risk management system.

Main functions and tasks of key participants in the risk management system

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Risk management is one of the functions of the Audit Committee under the Board of Directors of the Company. The committees set up by the Executive Board of the Company (Freight Committee, Investment Committee, Finance Committee, Technical Policy Committee – Technical Council, etc.) also carry out risk management within their respective competence.

In accordance with the RMS Regulations, the Strategic Planning and Development Department is in charge of coordinating risk management activities. A description of key participants in the risk management system and their main responsibilities is provided in the table above.

**Key risks**

The Group has created and regularly updates a register of risks that can have a significant impact on its operations. Risks are ranked by priority.

A list of key risks is provided in Annex 2 to this Annual Report.

In addition, the Company is implementing regular and one-time activities designed to prevent or minimise the likelihood of risks materialising. Such activities include: maintaining high navigation safety standards, monitoring global freight markets, building and deploying state-of-the-art vessels and renewing the fleet in a timely manner, planning and implementing required environmental measures, monitoring amendments to shipping industry regulations, and improving HR policies.

The implemented risk management measures together with a proactive response to emerging threats enabled the Group to minimise their impact on operations during the reporting period.

### 4.8.2. Internal control

Sovcomflot Group has in place an internal control system, which ensures the effective implementation of the Group’s internal business processes and is directly linked with the risk management system.

The internal control system is managed by the Company’s governing bodies (the Board of Directors, executive bodies - the Company’s Executive Board and Chief Executive Officer), committees under the Board of Directors, committees under the Executive Board (Freight Committee, Investment Committee, Finance Committee, Committee for Technical Policy – Technical Council, etc.), Vice-presidents, divisions in charge and the Company’s employees within their competence in accordance with the law and internal documents of the Company.

The efficiency of the internal control system is also bolstered by having independent directors on the Board of Directors and its committees. The current Board of Directors has four independent directors.

Effectiveness of the internal control system is assessed by the Auditing Commission and the Internal Audit Department.

---

3. Minutes of the Board of Directors No. 149 dated 13 November 2015.
4. Minutes No. 54/444 of the Executive Board meeting dated 11-12 December 2018.
4.9. INTERNAL AND EXTERNAL AUDIT

4.9.1. Internal audit

Internal audit helps enhance the Company’s management efficiency and improve its financial and economic activities through a systematic and consistent approach to the analysis and evaluation of the risk management system and internal control as well as corporate governance as tools providing reasonable assurance that the Company’s objectives will be achieved.

The PAO Sovcomflot Internal Audit Department (before February 2009: Internal Control Department) created in April 2006 is a standalone structural division of PAO Sovcomflot and operates in accordance with the regulations on the department. The latest revision of the regulations was approved by the PAO Sovcomflot Board of Directors decision on 26 May 2017 (Minutes No. 163).

The Internal Audit Department reports functionally to the PAO Sovcomflot Board of Directors and administratively reports to the PAO Sovcomflot Chief Executive Officer (Clause 11 of the Regulations on the Internal Audit Department). The Internal Audit Department is led by its head, who is appointed and dismissed by order of the PAO Sovcomflot Chief Executive Officer based on a decision of the Board of Directors (Clause 14 of the Regulations on the Internal Audit Department). The Internal Audit Department has four employees.

The Internal Audit Department operates on the principles of legality, independence and objectivity, is governed by the legislation of the Russian Federation, International Standards for the Professional Practice of Internal Auditing, and internal regulations of Sovcomflot Group, and interacts in its work with the Audit Committee under the Board of Directors, the Auditing Commission and external auditors of PAO Sovcomflot as well as its subsidiaries and affiliates (Clause 5.5. of the Regulations on the Internal Audit Department).

The main tasks and functions of the Internal Audit Department include:
- Assessing the efficiency and monitoring the adequacy of the internal control, risk management and corporate governance systems;
- Checking the financial, management and other reports for completeness and accuracy;
- Checking the effectiveness of control measures and other risk management activities;
- Controlling compliance by PAO Sovcomflot with internal documents, procedures and regulations, and their conformity to the current legislation of the Russian Federation;
- Putting forward proposals on ways to improve the efficiency of the existing internal control and risk management system, including the correction of identified violations and deficiencies (Sub-clauses 5.2 and 5.3 of the Regulations on the Internal Audit Department).

To increase the quality of the internal audit function, it is subjected to an external assessment on a regular basis, based on a Group management’s decision. An external assessment of the quality of the internal audit function in PAO Sovcomflot was conducted in December 2018 (the results of the external assessment were reviewed by the Board of Directors on 26 February 2019).

4.9.2. External audit

The accounting (financial) statements of PAO Sovcomflot for 2018 prepared in accordance with Russian accounting laws and the consolidated financial statements prepared in accordance with IFRS were audited by Ernst & Young LLC.

In accordance with legislative requirements, PAO Sovcomflot holds an annual open tender for selecting an auditor to conduct an independent audit of the financial statements of PAO Sovcomflot prepared in accordance with Russian accounting laws and the consolidated financial statements of PAO Sovcomflot prepared under Federal Law No. 208-FZ “On Consolidated Financial Statements” of 27 July 2010. For this purpose a tender commission is created and open tender procedures are carried out.

The tender is open, and the notice of tender and related tender documentation are published according to the procedure prescribed by law. Interested participants meeting Russian statutory requirements for auditors are invited to participate. The tender commission is comprised of three members appointed by the Board of Directors, which determines the study plan and approves the tender. The tender procedure is regulated by the regulation of the PAO Sovcomflot. The winner will be the audit firm that receives the most points based on an assessment of the bids. If there is a tie, the audit firm that was the first to submit a bid will be deemed to be the winner.

Information about the auditor

Full business name: Ernst & Young Limited Liability Company.

Record made in the State Register of Legal Entities on 5 December 2002, State Registration Number 1027739707203.

Address: 77 Sadovnicheskaya Embankment, bldg. 1, Moscow 115035, Russian Federation.

Ernst & Young LLC is a member of Self-regulated organisation of auditors “Russian Union of Auditors” (Association) located at 8 Petrovsky Per., bldg. 2, Moscow 107031, Russian Federation.

Ernst & Young LLC is included in the control copy of the register of auditors and audit organizations, main registration number 11603050648.

The dividend policy is based on maintaining an optimal balance of interests between PAO Sovcomflot and its shareholder when distributing net profit, and on the need to increase the investment appeal of PAO Sovcomflot and its capitalisation.
5.1. STRUCTURE OF THE SHARE CAPITAL

The authorised share capital of PAO Sovcomflot as at 31 December 2018 amounted to RUB 1,966,697,210 and consisted of 1,966,697,210 ordinary registered shares with a nominal value of one rouble each.

In accordance with the resolution of the Annual General Meeting of Shareholders of PAO Sovcomflot dated 30 June 2014 (Instructions No. 95-r of the Federal Agency for State Property Management dated 30 June 2014), it was decided to increase the authorised capital by placing additional 280,956,743 ordinary registered shares.

As part of implementing this resolution, on 17 December 2014 the PAO Sovcomflot Board of Directors (Minutes No. 141) approved the decision on the additional issue of ordinary registered uncertificated shares of PAO Sovcomflot and the securities prospectus for these shares. The said documents were registered with the Bank of Russia in 2015 (state registration number of the additional issue: 1-01-10613-A).

Taking into account the time limit for placing the Company’s additional share issue (not later than 1 March 2018), by the resolution of the extraordinary meeting of shareholders of PAO Sovcomflot dated 1 March 2018 (Instructions No. 95-r of the Federal Agency for State Property Management dated 1 March 2018) it was decided to cancel the placement of equity securities (1-01-10613-A) and to increase the authorised capital of PAO Sovcomflot by placing additional 280,956,743 ordinary registered uncertificated shares on the previous terms.

On 19 March 2018, in accordance with the resolution of the extraordinary general meeting of shareholders dated 1 March 2018 (Instructions No. 95-r of the Federal Agency for State Property Management dated 1 March 2018) to cancel the placement of equity securities (1-01-10613-A), the Bank of Russia passed a decision to recognise the additional issue of ordinary registered uncertificated shares of PAO Sovcomflot and the securities prospectus for these shares. The said documents were registered by the Bank of Russia on 22 November 2018 (state registration number of the additional issue: 1-01-10613-A).

5.2. DISTRIBUTION OF PROFIT

In relation to the distribution of net profit and the payment of dividends, PAO Sovcomflot is governed by Instructions No. 774-r of the Russian Government dated 29 May 2006 "On Establishing the Position of the Shareholder – the Russian Federation in Joint-Stock Companies", as well as the Regulations on the Dividend Policy of PAO Sovcomflot.

On 14 December 2012 the OAO Sovcomflot Board of Directors approved the Dividend Policy, which sets dividends at a level no lower than 25% of the net profit attributable to the PAO Sovcomflot shareholder, in accordance with the audited consolidated financial statements prepared under IFRS, and converted into roubles at the CBR exchange rate at the end of the reporting period.

On 30 May 2018 the Board of Directors recommended that the General Meeting of Shareholders allocate RUB 1,696 million in dividend payments, which equates to 0.86235949 roubles per ordinary registered share of PAO Sovcomflot.

On 29 June 2018 the annual PAO Sovcomflot General Meeting of Shareholders adopted a resolution on the payment of dividends in accordance with recommendations of the Board of Directors1. The amount of dividends was transferred in full by PAO Sovcomflot on 10 July 2018. Dividends based on the operating results for 2017 were paid in 2018 in full and by the deadlines set by Russian legislation. As at 31 December 2018 PAO Sovcomflot had no outstanding dividend payments.

Considering a positive financial result according to the accounting (financial) statements of PAO Sovcomflot prepared under RAS, it is deemed appropriate to set the amount of recommended dividends based on the performance of PAO Sovcomflot in 2018 at 50% of the RAS profit, or RUB 1,434.8 million.

6.1. OCCUPATIONAL HEALTH AND SAFETY

6.1.1. Safety management system and service quality

The fleet is operated as part of an integrated safety management system (ISMS).

The system is based on standard methods for ensuring the effective and safe technical operation of vessels and vessel equipment, approved in accordance with requirements of the International Safety Management Code (ISM Code), the ISO 9001:2015 (Quality Management System) and ISO 14001:2015 (Environmental Management System) standards, the Ship Safety Management System based on the ISM Code, as well as the requirements of the Flag Administration, and best industry practices.

Sovcomflot Group works with top-rank charterers, leading oil & gas companies and traders who care about their reputation and are demanding in the selection of their carriers. To meet customer expectations, the Company strives to exceed standard requirements, as evidenced by the results of external inspections. The best proof of Sovcomflot Group’s high level of reliability and qualification as a carrier is the willingness of key customers to sign long-term contracts with it. Today, SCF’s ships operate under time charter contracts with most of the major global oil & gas companies.

In 2018 the average number of observations related to navigational safety and quality, made during inspections of SCF vessels by oil majors, was 2.59 per inspection. This, according to OCIMF, is significantly better than the industry average (3.00).

Sovcomflot’s good safety practice is based on augmenting Russian maritime traditions. Respect for knowledge and the experience accumulated over decades provides an undisputed competitive advantage. SCF Group’s training centres in St. Petersburg and Nовороссийск, where SCF crews receive regular training and refresher courses have become an important element in the system of professional development of marine personnel.

Sovcomflot Group’s specialists conduct research on the features of Arctic shipping, provide support for innovative projects, and participate in discussions of industry regulations as part of working groups. To improve the safety and efficiency of ice escort operations in the Arctic, Sovcomflot employees regularly conduct joint seminars with Atomflot for seagoing and onshore personnel. In addition, the Company’s specialists regularly participate in meetings of the Maritime Safety Committee of the Russian Chamber of Shipping.

SCF Management Services (Dubai) responsible for the technical management of the entire SCF Group fleet is certified by Green Award - an international environmental organisation that was the first in the world to introduce an environmental assessment system for ships based not only on the ship’s technical characteristics, but also on the professional competence of the crew and management level. Sovcomflot Group has been participating in the Green Award scheme since 1996. Green Award auditors visit SCF’s ships and offices annually. Obtaining approval requires that international conventional requirements governing navigation safety, quality and environmental protection are not just met, but substantially exceeded. At the end of 2018, 14 SCF Group’s ships had Green Award certificates (which is warranted by the specifics of the region of operation).

Navigational safety and occupational health and safety issues are considered at various levels of Sovcomflot Group management. For example, the Board of Directors has set up the Committee for Innovative Development and Technical Policy, which conducts a preliminary review, analysis, and elaboration of recommendations on how the safety management system can be improved. The PAO Sovcomflot Executive Board has set up the Committee for the Safety of Navigation, Environmental Protection, Quality and New Technologies, which is responsible for establishing the areas, goals and objectives of the Group’s policy related to occupational health and safety.

6.1.2. Key occupational safety indicators

Sovcomflot Group has been steadily retaining mid-positions in rankings compiled by International Association of Independent Tanker Owners (INTERTANKO) in terms of occupational health and safety indicators, which is a good result and confirms quality of management and compliance with high safety standards.

The Lost Time Injury Frequency (LTIF) for the Group’s fleet in 2018 was 0.53. The Total Recordable Case Frequency (TRCF ) was 1.03. These figures are close to the average for the global tanker fleet.

The LTIF value (vs. 0.54 in 2017) 0.53

the TRCF value (vs. 1.15 in 2017) 1.03

As an industry leader, Sovcomflot adheres to the principles of sustainable development, giving priority to the safety of navigation, environmental protection, and maintaining a high quality service. Recognising its responsibility to the global community, Sovcomflot declares: Safety Comes First.
6.2. HUMAN RESOURCES AND SOCIAL PROGRAMMES

6.2.1. Employment policy

The professionalism of ship masters and crew members, as well as employees of onshore units, plays an important role in achieving goals set by the Sovcomflot Group’s development strategy.

In accordance with the Group’s employment policy, all crews in the SCF fleet are manned with maritime professionals whose performance meets the world’s best standards.

The Employment Policy is reflected in a system of internal regulations geared to attract and select qualified personnel, provide professional development (training, career growth, talent pool), motivation and incentives for employees, and assess their performance.

The Sovcomflot Group pays special attention to the career growth and development of its employees. A performance appraisal of the Group’s employees based on key performance indicators is regularly conducted. Based on the results of the 2017 performance appraisal, in 2018 the Group promoted 354 employees, including 103 senior officers, 295 junior officers, and 155 ratings.

The key areas of HR activities carried out by SCF Group are as follows:
- Enhancing the attractiveness of work on the Group’s vessels, combined with improving the system for selecting, training and managing of ships with competent crews;
- Optimising costs through benchmarking and aligning with industry averages;
- Further improving the personnel motivation system, implementing the long-term incentive programme designed for five years. At the start of the programme, in 2015, the best masters and chief engineers employed on Sovcomflot Group vessels became its participants.

The Group has developed a programme to promote the most talented chief officers and second officers to the positions of master and chief engineer respectively.

6.2.2. Professional development

A shipping company’s performance largely depends on the skills of the seafarers entrusted with the navigation of high-tech vessels. Therefore, Sovcomflot actively participates in professional development of its employees.

The Group regularly organises seminars for fleet officers to exchange professional experience. In the reporting year, 714 fleet officers participated in these seminars.

In 2018, 4,530 people completed 13,705 refresher courses at the Company expense in accordance with the STCW convention and SCF’s requirements.

The SCF Group’s operating specifics create the need for subject matter specialists. As part of the training and retraining, training is organised both through cooperation with state maritime educational institutions and at in-house training centres.

Main types of cooperation with maritime educational institutions

<table>
<thead>
<tr>
<th>Type of cooperation</th>
<th>Nature of cooperation</th>
<th>Training results</th>
</tr>
</thead>
<tbody>
<tr>
<td>Navigational practice</td>
<td>Cadets and trainees from maritime universities receive hands-on training at sea on board the Group’s vessels.</td>
<td>In 2018, 166 cadets from maritime universities and 21 sailor trainees and motormen received practical training on board the SCF vessels.</td>
</tr>
<tr>
<td>Targeted training of specialists</td>
<td>SCF Group implements targeted training programmes for young fleet officers in collaboration with leading Russian maritime universities. The dedicated group of cadets at Admiral Makarov State University of Maritime and Inland Shipping in 2018 consisted of 20 people: 8 navigators, 8 ship engineers, and 4 electrical officers. A similar dedicated group of 20 people was formed from third-year cadets at Admiral Nevelskoy Maritime State University.</td>
<td>As part of a joint project between SCF Group and Admiral Ushakov Maritime State University, a targeted enrolment programme for cadets within the quota for training funded from the federal budget has been operating at the University since 2014.</td>
</tr>
</tbody>
</table>

Sovcomflot personnel training system

Sovcomflot Group has created an in-house training system for fleet personnel and maintains the highest international standards.

This system includes two in-house training centres:
- The Novoship Training Centre in St. Petersburg, which provides training covering the whole range of maritime operations in the Arctic, including training on the skills needed for servicing oil platforms, navigation in northern latitudes, navigation in ice – both independently and accompanied by icebreakers, etc. The centre has been certified by classification society Russian Maritime Register of Shipping (RS) to ISO 9001:2015 ("Quality Management").
- The Novoship Training Centre in Novorossiysk, which has been operational for 15 years and today is one of Russia’s leading maritime educational institutions. The centre has been certified by RS to ISO 9001:2015 ("Quality Management") and under the STCW 78 Convention, as amended ("Quality Standards System").

According to the latest estimate by auditors, the Novoship Training Centre occupies 8.47% of the domestic market for specialised training.

Cooperation with maritime educational institutions

In order to attract young skilled specialists, Sovcomflot Group fosters cooperation with Russian maritime educational institutions.

The cooperation agreements previously concluded with the country’s three main maritime universities: Admiral Ushakov Maritime State University (Novosibirsk), Admiral Makarov State University of Maritime and Inland Shipping (Saint Petersburg), and Admiral Nevelskoy Maritime State University (Vladivostok) continued to be in effect in 2018.

Sovcomflot Group participates in the preparation and training of future specialists, provides support for teaching staff, helps organise navigation practice for cadets and internships for teachers on an annual basis, and takes part in renewing and modernising the material and technical base of universities.

As part of agreements on mutually beneficial collaboration with universities, Sovcomflot continues allocating funds to educational institutions, primarily for equipping classrooms and purchasing additional teaching aids, and supporting post-graduate students and young teachers.

7,027

SEAFARERS

received training in the SCF in-house training centres in all areas of training in 2018

Sovcomflot Group promotes professional development among its staff and encourages employees to pursue additional education in order to gain in-depth knowledge of modern technologies used in fleet operations. SCF’s engineering staff have very high scientific capabilities: currently, 17 seafarers, who completed post-graduate studies and received the title of Candidate of Technical Sciences or are preparing to defend their theses, work in the Company’s fleet.
6.2.3. Personnel motivation

Incentive and motivation programmes broken down by personnel categories

</tbody>
</table>

Social support for personnel

The social policy of the Group is implemented in accordance with the approved local regulations. The main goal of the SCF Group's social programmes is to attract and retain personnel, and enhance the reputation of Sovcomflot as a socially responsible employer.

The management companies belonging to Sovcomflot Group regularly conclude collective bargaining agreements with the Seafarers' Union of Russia (SUR). A collective bargaining agreement is one of the basic tools of the personnel management system guaranteeing employees a decent wage and safe working conditions meeting state and international standards.

About 97% of the Group's employees are covered by collective bargaining agreements (including 100% of fleet personnel).

Sovcomflot Group cooperates with the trade union in the following areas:
- Increasing wage levels;
- Preserving jobs;
- Ensuring safe working conditions;
- Insuring the fleet personnel of Sovcomflot Group against accidents during periods between voyages;
- Support programme for pensioners (one-time financial assistance, vouchers for health resort treatment, certificates of merit, and memorable gifts).

6.3. CHARITY AND SPONSORSHIP

Sovcomflot Group adheres to the principles of socially responsible business practices. The Company's charity and sponsorship activities are aimed at supporting educational institutions, enhancing the prestige of the maritime profession, preserving the cultural and historical heritage of our country, and taking care of industry veterans.

Charity and sponsorship work in Sovcomflot Group is carried out in accordance with the Regulations on Charity and Sponsorship approved by the PAO Sovcomflot Board of Directors on 17 December 2008 (Minutes No. 94) with the amendments and additions approved by the PAO Sovcomflot Board of Directors on 12 May 2010 (Minutes No. 104), 7 April 2015 (Minutes No. 143) and 31 July 2017 (Minutes No. 164), as well as in accordance with the budget appropriations for the 2018 financial year.

Distribution of the Group's sponsorship and charity expenses in 2018 (RUB million)

RUB 65.4 million (approximately US$1 million) - the total amount of the Group’s sponsorship and charity expenses in 2018. A major part of these expenses was devoted to support for sports and educational projects.
and neonatal intensive care.

In addition to providing material support to equip the classrooms and living quarters with necessary equipment, in 2018 Sovcomflot also assisted in organising trips for school residents to Smolensk, Moscow, St. Petersburg, the Patriot Park, the Alexander Griboedov Museum in Khmelitsy, the Trinity - St. Gerasim Bolodimy Monastery, and also helped them take part in the All-Russian Gathering of Young Sailors in the children’s camp Artek.

**St. Olga’s Children’s Hospital (Saint Petersburg)**

Sovcomflot Group has been allocating funds to equip the intensive care and anaesthesiology ward of the hospital with modern equipment which helps save the lives of new-born babies. In 2018, thanks to SCF’s care and anaesthesiology ward of the hospital with modern equipment Sovcomflot started cooperation with the university in 2016. With the Company’s participation, in 2018 the university continued the implementation of the pilot project «Social and pedagogical assistance and adaptation of orphans and children deprived of parental care» at the Safonovo Orphanage Boarding School. Master classes, trainings and sightseeing and pilgrimage trips were organised for orphanage residents.

The university expects to use this experience in the future work with other social institutions, in particular, in the Arkhangelsk, Murmansk and Volgograd Regions.

**Support for professional maritime education**

Sovcomflot attaches great importance to supporting maritime educational institutions. To this end, Sovcomflot for many years has been actively cooperating with the country's key maritime universities: Admiral Makarov State University of Maritime and Inland Shipping (St. Petersburg), Admiral Ushakov Maritime State University (Novorossyisk) and Admiral Nevelsky State Maritime University (Vladivostok).

This work is carried out under long-term agreements with universities, which cover a wide range of projects. Sovcomflot provides cadets with the opportunity to receive practical training at sea on the Company’s vessels on an annual basis and regularly organises internships for teachers. Targeted training programmes for future officers of the Company’s fleet are being successfully implemented, research is being conducted. Thus, the Floating Laboratory, a joint project with Admiral Nevelsky State Maritime University, is operating onboard the ice-breaking multifunctional vessel Gennadiy Nevelskoy. The goal of the project is to conduct fundamental and applied research in the field of electric propulsion and operational aspects of shipboard equipment in ice navigation conditions.

Sovcomflot is interested in expanding cooperation with maritime universities and intends to maintain and develop existing partnership.

**Youth Maritime League**

Sovcomflot has been developing cooperation with the public organisation Youth Maritime League for four years. This support enables it to annually conduct major events for children and teenagers, in particular, All-Russian Gathering of Young Sailors (May, Children’s Centre «Artek» in Crimea) and the Gathering of Young Sailors from the Urals, Siberia and the Far East (September, Children’s Centre «Ocean» in Primorye). A total of over 2,000 people from 42 Russian regions became participants in such gatherings over the period of cooperation.

During gatherings young sailors learn fleet skills, study the history and traditions of the Russian marine fleet, visit places of military glory. Red Sails, a sailing and rowing regatta, was organised for participants in the gathering in the Artek; participants in the gathering in the Ocean embarked on a two-day training voyage on board the Frigate Pallada. The winners in both gatherings received the opportunity to take part in the Pacific Regatta (August-September 2018) as sailor boys.

**Eurasian Centre for the Preservation of Far Eastern Leopards (Primorsky Krai)**

Sovcomflot has been sponsoring the programme aiming to preserve in the wild the rarest leopard subspecies, the Far Eastern Leopard, for five years. The Company’s support helps address a number of key issues faced by the Land of Leopard National Park, such as expanding the predators’ habitat and ensuring their forage density. A new bio cluster named «Leopards on Gamov» was created on the Sea of Japan coast in 2018. The cluster covered over 6,000 hectares of taiga not subjected to anthropogenic influence. Work is being carried out to provide facilities for the cluster, equipment has been purchased to maintain the territory and protect it from fires.
The centre’s specialists expect that the leopard’s conservation status can be changed from the «critically endangered» to «vulnerable» in 5-7 years. This actually means that the leopard will be saved.

Centre for the Study and Preservation of the Amur Tiger Population (Primorsky Krai)

Sovcomflot has been supporting the project for the study and preservation of the Amur tiger populations in the Far East since 2016. The Amur tiger is the northernmost subspecies of tiger and is listed in the Red Book. The goal of the project is to increase the Amur tiger population in Russia to 700 by 2022 with the simultaneous expansion and consolidation of its habitat.

Sovcomflot’s support helps the centre develop its research programme, monitor the tiger population, increase the effectiveness of the tiger’s protection outside the specially protected natural reserves, as well as carry out awareness-raising and educational activities and improve the regulatory framework.

CULTURE

Russian America Project (Fort Ross, U.S.)

Since 2012, Sovcomflot, in partnership with Transneft and Chevron, has been assisting in preserving Fort Ross, a monument of Russian history and culture in the U.S. This former Russian mercantile settlement in California was founded in 1812. Fort Ross is listed on the U.S. National Register of Historic Places and is a Historical Park of the state of California.

Fort Ross Dialogue, an international forum focusing on economic and cultural interaction between Russia and the U.S., is a continuation of this initiative. Forum events are held twice a year, once in the U.S. and once in Russia.

All-Russian Federation of Sailing

Sovcomflot has been providing sponsorship support to the Federation since 2010. The Company’s efforts are primarily directed at developing children’s and youth sailing: organising new schools and sections in Russian regions, regularly holding major children’s competitions, including championships in the Optimist class. In addition, Sovcomflot’s support helps the Federation provide training for Russian Paralympic athletes.

SPORTS

Vladimir Salnikov Cup (Saint Petersburg)

Since 2009, Sovcomflot has been providing support for Vladimir Salnikov Cup, an international swimming tournament featuring the strongest athletes from Russia and around the world. These competitions have been included in the European Swimming League (LEN) calendar as a top-level international tournament for many years, and in 2018 the Cup was included in a similar calendar of International Swimming Federation (FINA) events.

In 2017 the tournament attracted 264 sportsmen from 15 countries. The winners were Evgeny Rykhlov (Russia) and Sarah Koehler (Germany). Altogether five different records were set during the tournament, including two world junior records.

Sovcomflot has been participating in organising and holding commemorative meetings between Russian and British veterans of the Northern convoys for 10 years. The Company seeks to pay tribute to the memory and respect for the heroism of people who helped ensure the delivery of vital cargoes for our country to Arkhangelsk and Murmansk during the Second World War.

SCF Far East Tall Ships Regatta 2018

The first international tall ships race in the region’s contemporary history took place in August-September 2018 in the Russian Far East. The regatta was held under the patronage of Russian President Vladimir Putin. The organising committee for preparing and holding international tall ships regattas in Russia in 2018-2022 was headed by Russian Minister of Transport Yevgeny Dietrich.

Sovcomflot was the initiator, title sponsor and one of the organisers of the regatta. With the support of the company, the international tall ships regattas are held in Russia on a regular basis. The company is confident that marine sports attract youth’s interest in the maritime profession.

Sailing practice has always been and remains the most important element of the professional training system for cadets of maritime universities. International events of such level contribute to increasing youth’s interest in the maritime profession and strengthening good neighbourly relations among States and peoples, traditions of mutual respect, mutual understanding and mutual assistance.

The regatta was officially launched in Yeosu (South Korea) and ended in Vladivostok. The arrival of the ships to Vladivostok was timed to coincide with the 4th Eastern Economic Forum. 7 tall ships and 62 yachts from Russia, Indonesia, China, Korea and Japan took part in the competition. Crews of these ships included over 450 young sailors - cadets and sailor boys.

The prize for the first place in the regatta was presented to the captain of the Russian sailing ship Nadezhda. The Japanese Kaiwo Maru was awarded for contribution to the development of sailing traditions and seamanship. The crew of the schooner Koreana from South Korea won the International Marine Brotherhood award. The Friendship Prize for contribution to the development of international cooperation and mutual understanding was presented to the crew of the tall ship Bima Suci (Indonesia).

I’m pleased that this outstanding, interesting project has taken place, has received wide support in our country and abroad, and has become a good international tradition. Wherever your competitions are held, be it in the Baltic, in the Black Sea, or here, in the Pacific Ocean basin, they invariably enjoy popularity. It is important that the Regatta unites people of different ages, who are sincerely committed to the cause they chose and maritime fraternity. Cadets, schoolchildren who take their first steps in the art of ship navigation, are given a great opportunity to learn professional secrets from experienced seafarers, to showcase their talents and the best human qualities required at sea - courage, endurance and team spirit. I am confident that the Regatta will contribute to the development of humanitarian contacts in Asia Pacific.

VLADIMIR PUTIN, Russian President
6.4. ENVIRONMENTAL PROTECTION

6.4.1. Environmental protection policy

The Sovcomflot Group fleet meets the highest environmental standards taking into consideration both current and planned norms and requirements.

All the new tankers of Sovcomflot Group have an additional class notation confirming their high-environmental compatibility. This is another proof of the responsible attitude of PAO Sovcomflot to environmental issues.

In 2018 no spills of chemicals, oil or fuel from the fleet were registered. However, Sovcomflot Group’s operating specifics are associated with certain man-made environmental impacts, which include:
- emissions from different types of ship fuel burned by ship engines;
- discharge of wastewater generated by ships.

The Sovcomflot Group environmental protection policy is an integral component of the overall management system for safe operation of ships and pollution prevention established in accordance with the International Safety Management Code, which lays down the principles, goals, objectives and key areas of the company’s environmental safety activities.

The main goals of the SCF environmental protection policy are to increase environmental sustainability of the fleet and to raise the capitalisation of the Group by ensuring the reliability and environmental safety of the services rendered.

The Environmental Protection Policy provides for the following activities:
- Environmental monitoring and audits;
- Programmes aimed at increasing the competencies and awareness of personnel in relation to environmental protection;
- Investment programmes to increase the energy efficiency and environmental safety of core operations;
- Environmental risk management programmes, which include risk identification and assessment, implementation of environmental protection measures, and monitoring and assessing their adequacy.

Sovcomflot Group has in place an environmental management system, which was established in accordance with the principles, goals and objectives of the Environmental Protection Policy, and encompasses the activity of all employees of the Group, from ships’ crews to top management.

On 12 September 2018, during the 4th Eastern Economic Forum, Sovcomflot Group and the Russian Ministry of Natural Resources and Environment signed an agreement on the development of long-term cooperation in ensuring environmental safety and preserving the natural environment of the Russian Arctic. The agreement, in particular, provides for the development of proposals for the implementation of comprehensive measures to stimulate the use of new environmentally friendly types of marine fuel, primarily LNG, the development of other “green technologies,” as well as information exchange and joint activities to prevent substandard navigation in the Arctic seas.

6.4.2. Atmospheric emissions

Air emissions from marine vessels account for 5 to 10% of global emissions from the transport sector.

The basic components of atmospheric emissions are carbon, sulphur and nitrogen oxides formed during the combustion of fuel in ship engines.

Dynamics of carbon dioxide (CO2) emissions, 000 tonnes

![Dynamics of carbon dioxide (CO2) emissions, 000 tonnes](image)

The decrease in CO2 emissions is due to the increase in the use of LNG fuel in 2018 to 12% of the total fuel consumption of the fleet, which generally boosts the energy efficiency of ships.

Energy Efficiency Operational Index (EEOI) is calculated as the total CO2 emissions (in grammes) produced on a voyage per total tonne-miles generated (tonnes carried multiplied by distance travelled).

The table below shows the EEOI calculation for different types of Sovcomflot Group’s vessels operating on voyage (spot) contracts. In this case, fuel for the vessels is procured by the ship owner or fleet operator. A decrease in the EEOI index means a decrease in carbon oxides emissions and, accordingly, in fuel consumption per tonne-mile, which characterises an improvement in the operational performance of the company’s fleet.

<table>

</tbody>
</table>

The decrease in CO2 emissions is evident from figures: the reduction of sulphur oxides and soot emissions reaches 100%, nitrogen oxides emissions decrease by 76%, and carbon dioxide emissions - by 27% as compared with power plants running on conventional heavy fuel.
6.4.3. Wastewater and waste management
A key focus of the Sovcomflot Group’s environmental protection activities is reducing the amount of wastewater and waste that gets into the World ocean during ship operations. These activities are carried out pursuant to the internal procedures of the Group, which encompass the requirements of both international and domestic legislation.

At present the Group’s ships are equipped with wastewater treatment systems that combine mechanical, chemical, physical-chemical (including electrolysis) and biological methods. All wastewater treatment plants on board ships have the approval of classification societies confirming compliance with the requirements of Annex IV of the MARPOL 73/78 Convention. The quality of discharged water is confirmed by a wastewater plant certificate (type approval certificate).

Management of garbage produced on ships during operations is also organised in strict compliance with Annex V of the MARPOL 73/78 Convention, which governs the prevention of pollution by garbage from ships.

27% the reduction in the total amount of various types of garbage generated by the Group’s vessels during operation in 2018 compared to 2017

6.4.4. Energy consumption and efficiency
Different types of ship fuel are the main types of energy resources consumed during operations of the Group.

Sovcomflot Group is actively engaged in work to implement a state programme for introducing gas engine fuel in the transport sector. In 2018, the share of gas engine fuel amounted to 12 % of the total ship fuel consumption against 7.7 % a year earlier. The increase in this indicator is due to an increase in the intensity of liquefied gas transportation and the addition of new-generation LNG-fuelled vessels to the Group’s fleet. The SCF fleet includes five LNG tankers equipped with LNG-powered internal combustion engines and four LNG tankers that also use gas fuel for the ship power plant (steam turbine). In addition, three dual-fuel Aframax tankers using liquefied natural gas as the primary fuel were brought into service in 2018.

12% THE SHARE OF GAS ENGINE FUEL in the total amount of ship fuel consumed (vs. 7.7 % in 2017)

The consumption of energy resources such as heat, electricity, motor gasoline is associated with the operation of the Group’s onshore units. Their consumption volume is insignificant compared to consumption volumes of different types of ship fuel. The Group does not consume any types of energy resources other than those listed above.
6.4.5. Energy efficiency initiatives

Energy consumption reduction is conducive to minimising negative impact on the environment. Sovcomflot Group has developed and implemented an Energy Conservation and Energy Efficiency Programme, aimed at promoting the efficient use of fuel and energy resources and improving the environmental sustainability of the fleet.

Energy audits are conducted regularly on the Group’s ships. These make it possible to obtain reliable information on the consumption of fuel and oil and the energy efficiency of ship engines and boilers and to identify opportunities for saving energy and increasing the energy and environmental performance of ship power plants.

During 2018 Sovcomflot Group continued to implement a number of organisational and technical measures to promote efficient use of fuel and energy resources and improve the environmental sustainability of the fleet:
- Applying slow steaming on ships to reduce fuel consumption and air emissions. The results show that operating vessels at low speeds (7-9 knots) with the main engine loads less than 40 % of MCR increases their energy efficiency and environmental compatibility.
- Determining and applying the optimal pitch angle for each vessel during ballast voyage to minimise fuel consumption on the main engine. The optimal trim was determined for each series of vessels by conducting thermal tests at various pitch angles. This measure has been used on the Company’s ships since 2009.
- Monitoring and optimising energy consumption for heating and ventilation in the ships' living quarters.
- Optimising the power output in navigation and harbour modes.
- Establishing an energy conservation culture on ships.
- Checking fuel and oil consumption meters on ships.
- Monitoring the state of the hull and its timely cleaning. The main engine propeller characteristics are monitored. The speed of the ship relative to land and water, weather conditions, and propeller slip are controlled on a daily basis.
- In some cases, underwater images are taken to evaluate hull fouling.
- Ensuring that the consumption of main engine cylinder oil does not exceed the recommended level.
- Determining readiness of the ship's power plant depending on the harbour accommodation and requiring a minimum number of mechanisms working (instant readiness and readiness at a given time).
- Using innovative low-friction hull coatings in order to increase the inter-docking period, reduce the hull fouling and eliminate the need for underwater hull cleaning between dockings.
- Replacing incandescent light bulbs with energy-saving (fluorescent, including compact fluorescent, and LED) bulbs on a scheduled basis. Placing light sources (local lighting, spot lighting) in an optimal way. Increasing the light output of existing sources (replacing lamp shades, clearing them, using more efficient reflectors). Using lighting control devices (motion sensors, light sensors, timers).

Sovcomflot Group realises its high responsibility for the quality of the environment and seeks to minimise impacts on the environment by introducing innovations, reducing energy consumption, and increasing staff qualifications.
1. REPORT ON COMPLIANCE WITH THE PRINCIPLES AND RECOMMENDATIONS OF THE BANK OF RUSSIA CORPORATE GOVERNANCE CODE

This report on compliance with the principles and recommendations of the Corporate Governance Code of the Bank of Russia (the ‘CG Code’) was reviewed by the PAO Sovcomflot Board of Directors as part of its review of the 2018 Annual Report of PAO Sovcomflot at the meeting held on 11 April 2018.

The Company recognises that high standards of corporate governance are important not only for improving investment attractiveness, but also for enhancing the Company’s performance and reputation.

In the reporting year the Company continued work to improve the corporate governance model and practice, in accordance with the road map for implementing the CG Code at PAO Sovcomflot, approved by the Board of Directors in 2015, the following key internal documents that set forth the principles of corporate governance were updated (or re-approved): Amendments to the Charter of PAO Sovcomflot and Regulations on the PAO Sovcomflot Board of Directors. These documents were updated to reflect recommendations of the CG Code, as well as the specifics of the Company’s operations. The results of the CG Code implementation in accordance with the road map were reviewed by the Company’s Board of Directors in 2018.

The form below contains the recommendations of the Corporate Governance Code observed, partially observed or not observed by the Company, with justification of the reasons for non-observance (or partial observance) and indication of alternative mechanisms used by the Company and its plans for improving the corporate governance system.

<td>1.1</td>
<td>The company should ensure fair and equal treatment of all of its shareholders in the course of exercise by them of their right to participate in management of the company</td>
<td>1. The internal document of the company approved by the general meeting of shareholders and governing procedures for holding a general meeting are available in the public domain.</td>
<td>Not observed (non-applicable)</td>
<td>Considering the fact that the sole shareholder of PAO Sovcomflot is the Russian Federation, in accordance with Clause 1, Article 37 of the Federal Law “On Joint-Stock Companies”, the provisions defining the procedure and time limits for preparing, convening and holding the general meeting are not applied, except for provisions related to time limits for holding annual general meeting.</td>
</tr>
<tr>
<td>1.1.4</td>
<td>Procedures for notification of the general meeting and provision of materials for it should enable the shareholders to get properly prepared for participation therein</td>
<td>1. A notice of the general meeting was posted (published) on the website at least 10 days prior to the date of the meeting.</td>
<td>Observed</td>
<td></td>
</tr>
<tr>
<td>1.2</td>
<td>Shareholders should be given equal and fair opportunities to participate in the profits of the company by means of receiving dividends</td>
<td>1. The company has developed a dividend policy which has been approved by the board of directors and disclosed.</td>
<td>Observed</td>
<td></td>
</tr>
</tbody>
</table>

1.1.5 During the preparation for and holding of the general meeting the shareholders should be able to freely and timely receive information about the meeting, to pose questions to members of the company’s executive bodies and board of directors, and to communicate with each other

1. In the reporting period the shareholders were given the opportunity to pose questions to members of the company’s executive bodies and board of directors before and during the annual general meeting.

2. Positions of the board of directors (including special opinions recorded in the minutes) regarding each item on the agenda of the general meetings held during the reporting period were set out in the materials for the general meeting.

3. The company provided the eligible shareholders with access to the list of persons entitled to attend the general meeting from the date it was received by the company in all cases when general meetings were held in the reporting period.

1.1.4 There should be no unjustified difficulties preventing shareholders from exercising their right to demand that a general meeting be convened, to nominate candidates to the company’s governing bodies, and to place proposals on its agenda

1. In the reporting period the shareholders were able to place proposals on the agenda of the annual general meeting at least during 60 days after the end of the corresponding calendar year.

2. In the reporting period the company did not refuse to include shareholder proposals on the agenda or candidates for the company’s bodies due to typographical or other insignificant flaws in such proposals.

1.1.5 Each shareholder should be able to freely exercise his/her right to vote in a straightforward and most convenient way

1. An internal document (internal policy) of the company contains provisions whereby each participant in the general meeting may, until the end of the general meeting, request that a copy of the voting ballot filled out thereby be certified by the counting commission.

1.1.6 Procedures for holding a general meeting set by the company should provide equal opportunity to all persons present at the general meeting to express their opinions and ask questions that might be of interest to them

1. At the general meetings of shareholders held in the form of joint presence during the reporting period a sufficient time for reports on the agenda was provided and there was sufficient time to discuss these issues.

2. Candidates to the company’s management and control bodies were available to answer questions from shareholders at the meeting at which their candidates were put to the vote.

5. When making decisions related to the preparation for and holding of general meetings, the board of directors considered using telecommunication systems to provide the shareholders with remote access to the general meetings during the reporting period.

1.2 Shareholders should be given equal and fair opportunities to participate in the profits of the company by means of receiving dividends

1. The company has not made a decision on the payment of dividends, if such decision, without formally violating limits set by law, is unjustified from the economic point of view and might lead to false assumptions about the company’s activities.

The company recognises that high standards of corporate governance are important not only for improving investment attractiveness, but also for enhancing the Company’s performance and reputation.

</tbody>
</table>
The chairman of the board of directors should be an effective and professional governing body, which is able to exercise objective independent judgments and make decisions in the best interests of the company and its stakeholders.

2.3 Only persons with impeccable business and personal reputation as well as knowledge, skills and experience necessary to make decisions that fall within the competence of the board of directors and are required for the effective performance of its functions should be elected to the board of directors.

2.3.1 Only persons with impeccable business and personal reputation as well as knowledge, skills and experience necessary to make decisions that fall within the competence of the board of directors and are required for the effective performance of its functions should be elected to the board of directors.

2.3.2 Members of the company’s board of directors should be elected through a transparent procedure enabling the shareholders to obtain information about candidates sufficient for them to get an idea of their personal and professional qualities.

2.3.3 In the case of each general shareholders’ meeting with an agenda including the election of the board of directors held during the reporting period, the company presented to the shareholders biographical details of all candidates to the board of directors, the results of evaluation of the candidates by the board of directors (or its nominating committee), information on whether the candidates meet the independence criteria in accordance with recommendations 102 - 107 of the Code, and the written consent of the candidates to be elected to the board of directors.

2.3.4 The membership of the board of directors should include a sufficient number of independent directors. An independent director should be a person who has sufficient professional skills, experience and independence to have his/her own position, is able to make objective and sound judgments, free from the influence of the executive bodies, any individual group of shareholders or other stakeholders. It should be noted that, under normal circumstances, a candidate (or an elected member of the board of directors) may not be deemed to be independent, if he/she is associated with the company, its substantial shareholder, material counterparty, competitor, or the government.

2.4 The board of directors should include a sufficient number of independent directors.

2.4.1 An independent director should be a person who has sufficient professional skills, experience and independence to have his/her own position, is able to make objective and sound judgments, free from the influence of the executive bodies, any individual group of shareholders or other stakeholders. It should be noted that, under normal circumstances, a candidate (or an elected member of the board of directors) may not be deemed to be independent, if he/she is associated with the company, its substantial shareholder, material counterparty, competitor, or the government.

2.4.2 Candidates to the board of directors should be evaluated to determine whether they meet the criteria of independence, with a review to determine whether or not independent board members meet the independence criteria conducted on a regular basis. When carrying out such evaluation, substance shall take precedence over form.

2.4.3 Independent directors should account for at least one-third of all directors elected to the board of directors.

2.4.4 Independent directors should play a key role in preventing internal conflicts in the company and its material corporate actions.

2.5 The chairman of the board of directors should help it carry out the functions assigned to the board in a most efficient manner.

2.5.1 The chairman of the board of directors should be an independent director or the senior independent director among the company’s independent directors should be identified, who would coordinate work of the independent directors and liaison with the chairman of the board of directors.

2.5.2 The role, rights and duties of the chairman of the board of directors and, if applicable, the senior independent director are defined in the company’s internal documents.

2.5.3 The chairman of the board of directors should ensure that the board meetings are held in a constructive atmosphere and that any items on the meeting agenda are discussed freely. The chairman should also monitor fulfilment of decisions made by the board of directors.

2.5.4 During the reporting period the independent members of the Board of Directors met all the criteria of independence set out in recommendations 102 - 107 of the Code or were determined to be independent by decision of the board of directors.

2.5.5 The performance of the chairman of the board of directors was evaluated as part of the procedure of evaluating the performance of the board of directors in the reporting period.

2.5.6 The duty of the chairman of the board of directors should take the necessary measures to provide the board of directors to take measures to ensure that materials relating to the agenda of the board meeting are provided to the board members in a timely manner is set forth in the company’s internal documents.
2.6 Members of the board of directors should act in good faith and reasonably in the best interests of the company and its shareholders, being sufficiently informed, with due regard to the following:

2.6.1 Board members should make decisions considering all available information, with no conflict of interest, treating all shareholders equally, and in the context of normal business risks.

1. The company's internal documents establish that a member of the board of directors shall notify the board of directors if he/she has a conflict of interest relating to any item on the agenda of the meeting of the board of directors or its committee before discussion of such item is commenced.

2. The company's internal documents provide that a board member shall abstain from voting on any issues in respect of which he/she has a conflict of interest.

3. The company has established a procedure enabling board members to receive, at the expense of the company, professional advice on issues within their competence.

2.6.2 Rights and duties of board members should be clearly stated and documented in the company's internal documents.

1. The company has adopted and published an internal document that clearly defines the rights and duties of board members.

2. In accordance with the company's internal documents, board members have the right to access the company's documents and make inquiries concerning the company and entities under its control, and the executive bodies of the company are required to provide such information and documents.

2.6.3 Board members should have sufficient time to perform their duties.

1. Individual attendance of meetings of the board of directors and committees and the time devoted to preparation for meetings was taken into account when performing the procedure of evaluating the board of directors in the reporting period.

2. In accordance with the company's internal documents, board members are required to notify the board of directors of their intention to take a position in governing bodies of other entities (other than entities controlled or affiliated with the company), as well as of such appointment.

2.6.4 All board members should have equal opportunity to access the company's documents and information. Newly elected board members should be provided with sufficient information about the company and the work of its board of directors as soon as practicable.

1. In accordance with the company's internal documents, board members have the right to access the company's documents and make inquiries concerning the company and entities under its control, and the executive bodies of the company are required to provide such information and documents.

2. The company has a formalised introductory programme for newly elected board members.

2.7 Meetings of the board of directors, preparation for them, and participation in meetings should ensure efficient work of the board.

2.7.1 Meetings of the board of directors should be held as needed, having regard to the scope of the company's activities and the goals set by the company for a specific period.

1. The board of directors held at least six meetings during the reporting year.

2.7.2 The company's internal documents should establish a procedure for preparing for and holding board meetings that enables the board members to prepare properly for such meetings held in person.

1. The company has approved an internal document establishing the procedure for preparing for and holding board meetings which, inter alia, provides that a notice of a meeting shall be given, as a rule, at least 5 days before the date of the meeting.

2.7.3 The form of a meeting of the board of directors should be determined with due regard to the importance of the issues on the agenda. The most important issues should be decided at meetings held in person.

1. The company's charter or internal documents provide that the most important issues (according to the list provided in recommendation 5.1.b of the Code) shall be decided at meetings held in person.

2.7.4 Decisions on the most important issues relating to the company's activities should be made at a meeting of the board by a qualified majority vote or by a majority vote of all elected board members.

1. The company's charter provides that decisions on the most important issues outlined in recommendation 170 of the Code shall be made at a meeting of the board by a qualified majority of at least three-fourths or a majority of all elected board members.

2.7.5 The composition of the board of directors should be determined in such a way that it would allow a comprehensive discussion of issues being considered on a preliminary basis with due regard for differing opinions.

1. The committees of the board of directors are headed by independent directors.

2. Internal documents (policies) of the company include provisions that persons who are not members of the audit committee, nominations committee and remuneration committee may attend their meetings only at the invitation of their chairman.

2.7.6 Chairmen of the committees should inform the board of directors and its chairman of the work of their committees on a regular basis.

1. During the reporting period, chairmen of the committees reported on the work of their committees to the board of directors on a regular basis.

2.8 The board of directors should form committees for preliminary consideration of the most important issues relating to the company's financial and economic activities.
4.1 The level of remuneration paid by the company should be sufficient to: (a) attract, motivate and retain persons with the necessary skills and qualifications; (b) remuneration of members of the board of directors, the executive bodies and other key managers of the company should be paid in accordance with the remuneration policy adopted by the company.

4.1.1 The level of remuneration paid by the company to members of the board of directors, executive bodies and other key managers of the company should be sufficient to motivate them to work efficiently and enable the company to attract and retain knowledgeable and skilled specialists. The company should avoid setting the level of remuneration any higher than necessary, or creating an unjustifiably wide gap between the levels of remuneration paid to the above persons and other employees of the company.

4.1.2 The company’s remuneration policy should be developed by the remuneration committee and approved by the board of directors. The board of directors, with the support of its remuneration committee, should monitor introduction and implementation of the remuneration policy in the company and if necessary review and amend the same.

4.1.3 The level of remuneration paid by the company to members of the board of directors, executive bodies and other key managers of the company provides that the right to ownership of shares by board members, aimed at promoting long-term ownership of such shares is established and disclosed should not take part in option programmes.

4.1.4 The company should introduce a long-term incentive programme for members of the executive bodies and other key managers of the company involving the company’s shares (financial instruments, the underlying asset for which the company’s shares)...

4.1.5 The company’s remuneration policy (polices) contains (contain) transparent mechanisms to determine the amount of remuneration for members of the board of directors, the executive bodies and other key managers of the company, as well as to regulate all types of payments, benefits and privileges provided to the above persons...

#### About Strategy Group

**1. The company’s information policy provides a non-bureaucratic procedure for giving its shareholders access to information, including information about legal entities controlled by the company, at the request of shareholders.**

1. During the reporting period the company did not refuse shareholder requests for information or such refusals were justified.

2. In cases determined by the company’s information policy, shareholders are notified of the confidential nature of information and assume an obligation to keep it confidential.

####Share capital and dividend policy

**1. The company’s charter contains a list of material corporate actions, including: (a) increasing or reducing its share capital, listing and delisting of its shares, as well as other actions which might result in material changes in the rights of shareholders or reformation of their interests.**

1. During the reporting period the company did not refuse shareholder requests for information or such refusals were justified.

2. The company’s charter contains a list of transactions or other actions that constitute material corporate actions and the criteria for identifying them. Decisions on material corporate actions fall within the competence of the board of directors. In cases where the law expressly places these corporate actions within the competence of the general shareholders meeting, the board of directors provides appropriate recommendations to the shareholders.

2. According to the company’s charter, material corporate actions include, as a minimum, reorganisation of the company, acquisition of 50 or more percent of its voting shares (whenever) and entering by the company into major transactions, increasing or decreasing its share capital, and listing and delisting of its shares.

####Sustainable development

**1. The company’s information policy provides a non-bureaucratic procedure for giving its shareholders access to information, including information about legal entities controlled by the company, at the request of shareholders.**

1. During the reporting period the company did not refuse shareholder requests for information or such refusals were justified.

2. In cases determined by the company’s information policy, shareholders are notified of the confidential nature of information and assume an obligation to keep it confidential.

####Corporate governance

2. In cases determined by the company’s information policy, shareholders are notified of the confidential nature of information and assume an obligation to keep it confidential.

####About Strategy Group

1. The company has in place a procedure whereby independent directors can communicate their opinions on material corporate actions before they are approved.

1. Taking into account specific features of the company’s operations, its charter sets lower criteria for recognising the company’s transactions as material corporate actions than the minimum criteria set by law.

2. During the reporting period all material corporate actions passed an approval process before their execution.

4. MAJOR AND INTERESTED-PARTY TRANSACTIONS

a) Information on the interested-party transactions concluded by the Company during the reporting year, including a list of the transactions concluded by the Company during the reporting year which are considered related-party transactions in accordance with the Federal Law “On Joint-Stock Companies”, indicating an interested party (parties) on each transaction, essential terms and the company’s management body which passed the decision on approval of the transaction;

b) Information on the major transactions concluded by the Company during the reporting year, including a list of the transactions concluded by the Company during the reporting year which are considered major transactions in accordance with the Federal Law “On Joint-Stock Companies”, and other transactions to conclusion of which the approval procedure of major transactions applies in accordance with the charter of the company, indicating essential terms on each transaction and the company’s management body which passed the decision on approval of the transaction.

PAO Sovcomflot did not conclude major transactions in 2018. During the reporting period the Company made five interested-party transactions. One of them was approved in advance by the Company’s Board of Directors in accordance with statutory requirements.

In accordance with Article 83 of the Federal Law “On Joint-Stock Companies”, the Board of Directors approved the decision dated 21 September 2018 (Minutes No. 175) to approve an interested-party transaction - conclusion of supplementary agreement No. 6 to Contract No. SCF-5/2 dated 29 June 2012 (the “Contract”) between PAO Sovcomflot (the customer) and OOO SCF Arctic (the contractor) that amends the Contract as follows:

- Contract price: the cost of works under the Contract is 5,326,840 (five million two hundred thirty six thousand eight hundred and forty) rubles 00 kopecks, including 18% VAT of 788,840 (seven hundred ninety eight thousand eight hundred and forty) rubles 00 kopecks;
- The supplementary agreement to the Contract shall apply to the relations between the Parties from 1 April 2018;
- The rights and obligations of the parties not modified by the supplementary agreement shall remain unchanged and the parties shall be governed by the provisions of the Contract, subject to the terms of the supplementary agreement.

The supplementary agreement to Contract No. SKF-5/2 dated 29 June 2012 between PAO Sovcomflot and OOO SCF Arctic is an interested-party transaction for the following reasons: Members of PAO Sovcomflot Executive Board (E.N. Ambrosov; N.L. Kolesnikov; A.V. Ostapenko; I.V. Tonkovidov) concurrently act as Members of OOO SCF Arctic Board of Directors. Supplementary agreement No. 6 is concluded on 24 September 2018.

Interest-related transactions made by the company during the reporting period that do not require consent or approval of the company's management bodies according to the amendments to Federal Law “On Joint-Stock Companies” which entered into force on 1 January 2017:

1. Supplementary Agreement No. 5 dated 26 March 2018 to the Sublease Agreement dated 1 April 2013 between PAO Sovcomflot (the “Lessor”) and OOO SCF Arctic (the “Lessee”), under which the rented area as specified in Clause 1.1 of the Agreement was changed and the Lessee shall, for a consideration, provide to the Lessee for temporary use (sublease) a part of the non-residential building with a total area of 1,616.92 sqm (hereinafter jointly referred to as the 'Premises') located at 3a Mysya River Embankment, Saint Petersburg, for use as an office, and the Lessee shall use the Premises according to the terms of the agreement and pay the Lessor a rent for this.

In respect of all other obligations not covered by the said supplementary agreement the parties shall continue to be governed by the provisions of the Sublease Agreement.

The supplementary agreement to the Sublease Agreement enters into force on 01 April 2018.

2. Sublease Agreement for Premises dated 10 March 2018 between SCF Management Services (St. Petersburg) Ltd. (the “Lessor”) and PAO Sovcomflot (the “Sublessee”), under which the Lessee shall provide to the Sublessee for temporary use a part of the property, rented under the lease agreement dated 12 March 2018, of the non-residential building with a total area of 12 (twelve) sqm located at 8 Prospekt Oktjabrskogo, 3rd Floor, Vladiostok, Primorsky Krai, for use as an office. The Agreement is concluded for a period of 11 (eleven) months and enters into force on 01 April 2018. The size of a monthly rent for the subleased premises is 17,400.00 (seventeen thousand four hundred) rubles, VAT amount (8%) of 1,312.00 rubles, total amount of 20,152.00 (twenty thousand five hundred thirty two) rubles.

3. Supplementary Agreement No. 5 dated 15 May 2018 to the Sublease Agreement dated 10 December 2015 between PAO Sovcomflot (the “Lessor”) and OOO SCF GEO (the “Lessee”), under which the parties agreed to extend the lease of the Premises for the period from 01 May 2018 to 31 March 2019 on the previous terms. In all matters not covered by Supplementary Agreement No. 2 matters shall be governed by the terms of the Sublease Agreement and current legislation.

4. Supplementary Agreement No. 2 to the Sublease Agreement dated 10 December 2015 enters into force on 01 May 2018.

5. INFORMATION ON LITIGATIONS INVOLVING PAO SOVCOMFLOT

As a global shipping company, the Issuer operates in various jurisdictions and is involved in court/arbitration proceedings relating to cargo transportation by sea. The Issuer’s third-party liability is, as a rule, insured with international mutual insurance clubs, which assist the Issuer in the settlement of court/arbitration disputes.

In addition, in carrying out its activities the Issuer is governed by the requirements of anti-corruption laws and the highest corporate and ethical standards, the principles of fair and faithful conduct of business, and expects compliance with such standards from its business partners.

As part of the policies and procedures applied by the Issuer to counter fraud and corruption in any form, the Issuer initiated the following litigations between 2005 and 2007:

During 2005 through to 2009, a number of Sovcomflot Group companies filed claims in London against Yuri Nikitin, former Sovcomflot CEO Dmitry Skarga and former Novoship President Tagir Izmaylov for losses arising out of various transactions that had taken place from 2000 through to 2004. The trial of the claims commenced at the High Court in London in October 2009 and concluded in mid-2010. Judgment was handed down on 10 December 2010. The Group was successful on a number of claims, and unsuccessful on a number of others. In addition to the awarded damages, the Group recovered over $200 million from different defendants out of court.

As a result of the Group recovering at trial an amount less than the total amount of the two freezing orders granted against some of the defendants in 2005 and 2007 in the course of the proceedings, in December 2014 these defendants filed and claim for damages said to have been suffered by virtue of the freezing orders.

Following a trial, three judgments were handed down during August-October 2016. In relation to the 2005 freezing order the Court awarded the defendants $19.8 million in damages and $11.0 million in interest; a total sum of $70.8 million.

The Group appealed these judgments in higher courts and was granted a stay of execution pending the Supreme Court’s decision.

The application to the Supreme Court was refused in June 2018, and all the costs due to the defendants in relation to their claim (and the Group’s related appeals) were agreed and paid by the Group in July 2018.

In late 2005 the Group investigated a number of transactions which involved the former management of Novoship (UK) Ltd (“NOKU”). NOKU and other companies of the Group filed claims at the Commercial Court in London in December 2006 and subsequently joined further defendants. The trial for these claims commenced on 16 May 2012 and concluded on 5 July 2012. Judgment was handed down on 14 December 2012. The Group was initially successful on all claims, but after appeal unsuccessful on some claims against certain defendants. Those defendants have indicated an intention to pursue the Group for damages in respect of $90 million of security provided during the litigation. No claim has yet been filed for damages.

In relation to the successful claims concerning certain transactions involving the former management of NOKU, the Group was awarded $59.2 million plus interest. After initial recoveries of $79 million, in September 2013 the Group concluded a settlement agreement with some of the defendants. When payment was not received, in breach of the settlement agreement, the Group pursued various enforcement actions and subsequently recovered an additional $55.6 million, of which $40.6 million was received in 2015 and another $15 million in 2016.

On 25 April 2018, the Komenskýs Court of Moscow adjudged Yuri Nikitin, Dmitry Skarga and Tagir Izmaylov guilty of having committed a number of crimes during the period 2000-2005 and causing damage to the Group amounting to over $300 million. The accused were sentenced to long terms of imprisonment. In addition, the funds held by Yuri Nikitin and companies controlled by him as well as other property of the accused are subject to confiscation.

However, not all wrongdoing by Yuri Nikitin, Dmitry Skarga and Tagir Izmaylov were subjected to judicial review, and the Issuer is taking all necessary actions to protect its interests.
6. INFORMATION ON THE RESULTS OF IMPLEMENTING ORDERS OF THE RUSSIAN PRESIDENT AND THE RUSSIAN GOVERNMENT

- orders and decrees of the Russian President;
- orders of the Russian Government.

1. Information regarding the establishment of specialised committees under the Board of Directors (Supervisory Board) of the Company in accordance with Russian Government Order No. V2-P15-6794 dated 23 July 2009.

In accordance with the PAO Sovcomflot Board of Directors decision dated 5 February 2009 (Minutes No. 93), the following committees of the PAO Sovcomflot Board of Directors have been established: the Strategy Committee, the Audit Committee, and the HR and Compensation Committee.

In accordance with the PAO Sovcomflot Board of Directors decision of 25 February 2011 (Minutes No. 109 dated 28 February 2011), the Committee for Innovative Development and Technical Policy was created at PAO Sovcomflot.

2. On implementing the energy conservation and energy efficiency strategy of the joint-stock company in accordance with Clause 8 of Russian Government Order No. Ish-P9-3772 dated 18 June 2008 on the implementation of Russian Presidential Decree No. 889 dated 4 June 2008 “On Certain Measures to Increase the Energy and Environmental Efficiency of the Russian Economy”.

To implement Russian Presidential Decree No. 889 dated 4 June 2008 “On Certain Measures to Increase the Energy and Environmental Efficiency of the Russian Economy”, the PAO Sovcomflot Board of Directors considered on 17 December 2008 whether it was necessary to draft an energy conservation programme for PAO Sovcomflot. The energy conservation programme was included as an independent section of the PAO Sovcomflot Development strategy.

On 19 May 2011 the PAO Sovcomflot Board of Directors approved the Programme for the Sale of Non-Core Assets of Sovcomflot Group (Minutes No. 130). To implement this decision, the Board of Directors and the Executive Board of PAO Novoship (a subsidiary of PAO Sovcomflot) adopted respective decisions on the alienation of non-core assets.

In accordance with the methodological guidelines for identifying and disposing of non-core assets developed by the Federal Agency for State Property Management, the company has developed the following updated and new regulatory documents, which were approved by the PAO Sovcomflot Board of Directors on 11 October 2016 (Minutes No. 157 dated 13 October 2016):
- Non-Core Asset Disposal Programme;
- Regulations on the Sale of Non-Core Assets;
- Non-Core Asset Register.

In pursuance of Russian Government Order No. 894-r dated 10 May 2017, on 11 October 2017 (Minutes No. 167) the PAO Sovcomflot Board of Directors adopted a decision on amending the employment contract with the Company’s Chief Executive Officer to include provisions on personal responsibility for the disclosure of information about sale of non-core assets on the Interdepartmental Portal for State Property Management and a decision on conducting an analysis of the company's non-core asset disposal programme and register by 1 January 2018.

On 31 January 2018 (Minutes No. 169) the PAO Sovcomflot Board of Directors approved the revised non-core asset disposal programme and the updated non-core asset register.

Information contained in the Non-Core Asset Register is provided in a separate appendix to this annual report.

4. Information about activities aimed at drafting innovative development programmes in joint-stock companies included in the list of organisations that draft innovative development programmes, approved by Russian Government Order No. DM-P16-7563 dated 7 November 2015.

The PAO Sovcomflot Innovative Development Programme for the period 2011–2015 was approved by the PAO Sovcomflot Board of Directors on 19 May 2011 (Minutes No. 110 dated 25 May 2011), and was submitted to and approved by the Russian Ministry of Economic Development. PAO Sovcomflot has been annually submitting a report on the implementation of actions of the Innovative Development Programme to the Russian Transport Ministry, the Ministry of Education and Science of Russia, and the Russian Ministry of Economic Development.

Based on the results of the meeting of the Presidium of the Russian Presidential Council for Economic Modernisation and Innovative Development, PAO Sovcomflot, among other infrastructure and transport sector companies, is not included in the list of organisations that are required to draft innovative development programmes (Minutes No. 2 dated 17 April 2015).

At present the monitoring of the indicator of the company’s innovative development is included in the list of mandatory KPIs of the company, which is approved and assessed by the PAO Sovcomflot Board of Directors on an annual basis and is implemented by the company management.
11. On increasing labour productivity in accordance with Clause 6, Section 2 of the action plan to ensure an increase in labour productivity and
8. On including the main parameters of requirements for labour resources in the long-term development programme of the Company, including for
The system of key performance indicators (KPIs) adopted at PAO Sovcomflot, which are used to assess the annual performance of Executive Board
On 25 August 2016 the PAO Sovcomflot Board of Directors considered the issue "On Amending the Long-Term Development Programme of the Company" (Minutes No.145 dated 9 April 2015) and adopted the required decisions for the execution of Russian Government Orders.
On improving the system of key performance indicators of the Company in accordance with Clause 5 of the List of Orders of the President of the
On 25 August 2016 the PAO Sovcomflot Board of Directors considered the issue "On Increasing Labour Productivity at PAO Sovcomflot" (Minutes No.140 dated 12 December 2014) and adopted the necessary decisions.
On introducing a system of paying bonuses to managers based on key performance indicators of their activity, considering the need to reduce operating expenses (expenditures) by at least 2-5 percent (by 10 percent in 2016) in accordance with Sub-clause 5, Clause 1 of the List of Orders of the President of the Russian Federation No. Pr-2821 dated 5 December 2014, Clause 4, Section 2 of the minutes of the meeting held by the Prime Minister of the Russian Federation, No. DM-P13-2pr dated 18 January 2016 and Russian Government Order No. Ish-P13-2047 dated 11 April 2016.
The system of key performance indicators (KPIs) adopted at PAO Sovcomflot, which are used to assess the annual performance of Executive Board
On 10 December 2014 the PAO Sovcomflot Board of Directors was modified in accordance with the requirements arising from the PAO Sovcomflot Long-Term Development Programme (LDP). In particular, the list of KPIs and KPI targets has been brought in line with the LDP. Furthermore, in accordance with Russian Government Order No. Ish-P13-2045 dated 27 March 2014, the PAO Sovcomflot Board of Directors approved amendments to the Regulations on Wages and Material Incentives of Employees of PAO Sovcomflot at its meeting on 19 November 2014 (Minutes No.139 dated 24 November 2014).
On increasing labour productivity in accordance with Clause 6, Section 2 of the action plan to ensure an increase in labour productivity and establish and modernise highly productive working places, approved by Russian Government Order No. 1250-р dated 9 July 2014.

14. On introducing systems of lean manufacturing in accordance with Clause 2.3, Section 1 of the Minutes of the Russian Government Military-
15. On developing and approving a list of internal regulations governing activities of a joint-stock company and on ensuring that reports on the
On 25 August 2016 the Company's Board of Directors (Minutes No. 145) considered and approved an action plan (road map) developed by PAO Sovcomflot to implement the Corporate Governance Code.
In accordance with the above plan, in 2017 the company continued work to improve the corporate governance model and practice; in particular, key internal documents that set forth the principles of corporate governance were approved and implemented (in whole or in part), such as the PAO Sovcomflot Charter, Regulations on the PAO Sovcomflot Board of Directors, Regulations on the General Meeting of Shareholders of PAO Sovcomflot, Regulations on the Corporate Secretary of PAO Sovcomflot, Regulations on the Audit Committee of the PAO Sovcomflot Board of Directors, Regulations on the HR and Compensation Committee of the PAO Sovcomflot Board of Directors, and Regulations on the Internal Audit Department of PAO Sovcomflot. These documents have been updated in accordance with the approved road map by taking into account the recommendations of the Corporate Governance Code recommended by the Bank of Russia and the specifics of the Company’s operations.
On 7 April 2015 the Company’s Board of Directors (Minutes No. 145) considered and approved an action plan (road map) developed by PAO Sovcomflot to implement the Corporate Governance Code.
On 10 December 2014 the PAO Sovcomflot Board of Directors was modified in accordance with the requirements arising from the PAO Sovcomflot Long-Term Development Programme (LDP). In particular, the list of KPIs and KPI targets has been brought in line with the LDP. Furthermore, in accordance with Russian Government Order No. Ish-P13-2045 dated 27 March 2014, the PAO Sovcomflot Board of Directors approved amendments to the Regulations on Wages and Material Incentives of Employees of PAO Sovcomflot at its meeting on 19 November 2014 (Minutes No.139 dated 24 November 2014).
On introducing a system of paying bonuses to managers based on key performance indicators of their activity, considering the need to reduce operating expenses (expenditures) by at least 2-5 percent (by 10 percent in 2016) in accordance with Sub-clause 5, Clause 1 of the List of Orders of the President of the Russian Federation No. Pr-2821 dated 5 December 2014, Clause 4, Section 2 of the minutes of the meeting held by the Prime Minister of the Russian Federation, No. DM-P13-2pr dated 18 January 2016 and Russian Government Order No. Ish-P13-2047 dated 11 April 2016.
The system of key performance indicators (KPIs) adopted at PAO Sovcomflot, which are used to assess the annual performance of Executive Board
On 19 May 2015 the company’s board of directors (Minutes No. 144) made a decision on developing a set of measures aimed at the attainment of the indicator for reduction of operating expenses (expenditures) of at least 2-5 percent annually, and determining the target indicators of implementation of these measures, including the list of measures, indicators of implementation of these measures, and OPEX reduction indicators, starting from its value in 2015, in the Company’s long-term development programme, taking into account the provisions of the methodological guidelines on drafting long-term development programmes; including the target OPEX reduction indicator in the list of key performance indicators for management, that must be taken into account when making decisions on staff compensation and HR decisions, and linking the achievement of the OPEX reduction indicator with the amount of compensation of the Company’s management team; amending the employment agreement (contract) with the Company’s sole executive body so as to include therein an obligation to achieve the OPEX reduction indicator determined in the Company’s long-term development programme.
On 25 August 2016 the PAO Sovcomflot Board of Directors (Minutes No. 156 dated 25 August 2016) made a decision on developing a set of measures to reduce operating expenditures by at least 10%, with consideration of this issue at a meeting of the Board of Directors on a quarterly basis and quarterly submission of reports on the implementation of these measures to the Ministry of Transport.
On introducing an integral KPI of innovative activities in accordance with Russian Government Order No. AD-P36-6296 dated 15 September 2015
On introducing an integral KPI of innovative activities in accordance with Russian Government Order No. AD-P36-6296 dated 15 September 2015 (Clause 5), No. DM-P36-7563 dated 7 November 2015 and No. AD-P36-8381 dated 10 December 2015 (Clause 1).
On 25 August 2016 the PAO Sovcomflot Board of Directors (Minutes No. 156) made a decision on developing a set of measures to ensure the inclusion of an integral key performance indicator of innovative activities developed in accordance with the recommendations approved by Russian Government Order No. DM-P36-7563 dated 7 November 2015, starting from 2016.
On 6 December 2016 (Minutes No. 158) and on 12 December 2017 (Minutes No. 168) the PAO Sovcomflot Board of Directors approved the lists of target KPIs for the Company’s management, which include an integral KPI of innovative activities.
10. On including the main parameters of requirements for labour resources in the long-term development programme of the Company, including for engineering technical professions, in accordance with Sub-clause 6, Clause 2 of the List of Orders of the President of the Russian Federation, No. Pr-1627 dated 1 July 2014.
On 19 November 2014 the PAO Sovcomflot Board of Directors considered the issue "On Approval of the Long-Term Development Programme of the Company" (Minutes No. 139) and adopted the required decisions for the execution of this Order of the President of the Russian Federation.
On 9 March 2015 the PAO Sovcomflot Board of Directors, Regulations on the General Meeting of Shareholders of PAO Sovcomflot, Regulations on the Internal Audit Department of PAO Sovcomflot and Regulations on the Audit Committee of the PAO Sovcomflot Board of Directors, Regulations on the HR and Compensation Committee of the PAO Sovcomflot Board of Directors, and Regulations on the Internal Audit Department of PAO Sovcomflot. These documents have been updated in accordance with the approved road map by taking into account the recommendations of the Corporate Governance Code recommended by the Bank of Russia and the specifics of the Company’s operations.
On 9 September 2014 the PAO Sovcomflot Board of Directors (Minutes No. 158) made a decision on developing a set of measures aimed at the attainment of the indicator for reduction of operating expenses (expenditures) of at least 2-5 percent annually, and determining the target indicators of implementation of these measures, including the list of measures, indicators of implementation of these measures, and OPEX reduction indicators, starting from its value in 2015, in the Company’s long-term development programme, taking into account the provisions of the methodological guidelines on drafting long-term development programmes; including the target OPEX reduction indicator in the list of key performance indicators for management, that must be taken into account when making decisions on staff compensation and HR decisions, and linking the achievement of the OPEX reduction indicator with the amount of compensation of the Company’s management team; amending the employment agreement (contract) with the Company’s sole executive body so as to include therein an obligation to achieve the OPEX reduction indicator determined in the Company’s long-term development programme.
On 20 July 2015 the PAO Sovcomflot Board of Directors (Minutes No. 147) made decisions on drafting the following internal documents: Regulations on increasing the investment and operating efficiency and reduction of costs; Regulations on internal audit; Regulations on the quality management system; Regulations on the risk management system; Regulations on the preparation and implementation of the innovative development programme; and submitting information on the implementation of the guidelines concerning key performance indicators (KPIs) and long-term development programmes (LDPs) to the Federal Agency for State Property Management.
The respective internal documents have been drafted and approved by authorised governing bodies. The Company regularly updates information about the implementation of the above documents on the Interdepartmental Portal for State Property Management and reports thereto to the Federal Agency for State Property Management and Russian Ministry of Transport.

22. On developing and approving regulations to ensure rationing of procurement and introduction of procurement norms in joint-stock companies in accordance with Clause 2 of the List of Russian Government Orders No. DM-PP-8415 dated 12 December 2015.

On 31 May 2016 the Company’s Board of Directors (Minutes No. 153 dated 31 May 2016) made a decision on developing norms for procurement of goods, works and services providing for ceiling prices on such goods, works and services and/or requirements for their quantity, consumer properties and other characteristics ensuring that the customers’ needs are met preventing the procurement of goods, works and services with excessive consumer properties; posting them on the company’s website; their mandatory application; monitoring them on an annual basis; and ensuring that they are updated each year.

An internal document, “Norms for Procurement of Certain Goods, Works and Services by PAO Sovcomflot”, was approved by the PAO Sovcomflot Executive Board on 5 July 2017.

23. On monitoring the results of procurement activities of joint-stock companies, including as regards compliance with the approved procurement plan and relevant norms for procurement of goods, works and services for the needs of joint-stock companies and as to whether the intended use of goods, works and services procured by joint-stock companies corresponds to their chartered activities, and also on adjusting (updating) norms for procurement of goods, works and services for the needs of joint-stock companies.

On 31 May 2016 the Company’s Board of Directors (Minutes No. 153 dated 31 May 2016) made a decision on developing norms for procurement of goods, works and services providing for ceiling prices on such goods, works and services and/or requirements for their quantity, consumer properties and other characteristics ensuring that the customers’ needs are met preventing the procurement of goods, works and services with excessive consumer properties; posting them on the company’s website; their mandatory application; monitoring them on an annual basis; and ensuring that they are updated each year.

An internal document, “Norms for Procurement of Certain Goods, Works and Services by PAO Sovcomflot”, was approved by the PAO Sovcomflot Executive Board on 5 July 2017.

On 25 August 2016 the Company’s Board of Directors (Minutes No. 156 dated 25 August 2016) made a decision on developing a set of measures to ensure that occupational standards are implemented in PAO Sovcomflot with due regard for the provisions of Federal Law No. 122-FZ dated 2 May 2015 “On Amendments to the Labour Code of the Russian Federation” and Article 73 of the Federal Law “On Education in the Russian Federation” through approval and implementation of the relevant plans and taking into consideration the work on implementation of occupational standards in assessing and rewarding HR management at PAO Sovcomflot.

The company reports on the implementation of professional standards via the Interdepartmental Portal for State Property Management.

8. NON-CORE ASSET SALE PROGRAMME

In 2018, in accordance with the decision of the PAO Sovcomflot Board of Directors dated 31 January 2018 (Minutes No. 169 dated 5 February 2018) and based on the results of the analysis for compliance with the methodological guidelines for identifying and disposing of non-core assets approved by Russian Government Order No. 894-п dated 10 May 2017, a new version of the Programme on the Sale of PAO Sovcomflot Non-Core Assets was approved and the register of PAO Sovcomflot non-core assets, which also includes the non-core assets of its subsidiary PAO Novoship, was updated.

The Programme on the Sale of PAO Sovcomflot Non-Core Assets defines the main approaches, principles and procedures for identifying and disposing of non-core assets belonging to the Company.

The main objectives of the PAO Sovcomflot non-core asset disposal programme are to:
- promote more efficient use of assets and maximise income (minimise losses) on the sale of the Company’s property;
- reduce financial costs associated with the maintenance and servicing of non-core assets;
- form additional sources of financing;
- improve the competitiveness and investment attractiveness of the Company;
- increase capitalisation.
